

TABLE OF CONTENTS

PERFORMANCE MEASURES (VERSION 2.0)

I.	RESALE POTS, RESALE SPECIALS AND UNES	1
A.	Pre-Ordering/Ordering	1
	Performance Measurement Numbers:	
1	Average Response Time For OSS Pre-Order Interfaces (Deleted Effective 7/1/01).....	1
1.1	Average Response Time for Manual Loop Make-Up Information	2
1.2	Accuracy of Actual Loop Makeup Information Provided for DSL Orders	3
2	Percent Responses Received within “X” seconds – OSS Interfaces	4
4	OSS Interface Availability.....	7
4.1	Pre-Order Backend System Database Query Availability (Deleted Effective 7/1/01)	9
5	Percent Firm Order Confirmations (FOCs) Returned on time for LSR requests.....	10
5.1	Percent Firm Order Confirmations (FOCs) for XDSL-capable loops & Line Sharing Returned Within "X" Hours (Deleted Effective 7/1/01).....	14
5.2	Percent Firm Order Confirmations (FOCs) Returned within X days on ASR requests	15
6	Average Time to Return FOC (Deleted Effective 7/1/01).....	17
6.1	Average Time to Return DSL FOC's (Deleted Effective 7/1/01).....	18
7.1	Percent Mechanized Completions Notifications Available Within one Day of Work Completion.....	19
9	Percent Rejects	20
10	Percent Mechanized Rejects Returned Within one hour of receipt of LSR	21
10.1	Percent Manual Rejects Received Electronically and Returned Within X Hours	22
10.2	Percentage of Orders that receive SWB-caused Jeopardy Notifications	23
11	Mean Time to Return Mechanized Rejects (Deleted Effective 7/1/01).....	24
11.1	Mean Time to Return Manual Rejects that are Received Electronically via LEX or EDI (Deleted Effective 7/1/01).....	25
11.2	Average SWB-caused Jeopardy Notification Interval.....	26
12	Mechanized USOC Provisioning Accuracy	27
12.1	Percent Provisioning Accuracy for non-flow through orders.....	28
13	Order Process Percent Flow Through.....	29
13.1	Overall Percent LSR Process Flow Through.....	30
B.	Billing	32
	Performance Measurement Numbers:	
14	Billing Accuracy.....	32
15	Percent of Accurate and Complete Formatted Mechanized Electronic Bills via EDI or BDT	33
16	Percent of Accurate Usage Records transmitted (of those records that are are subject to active CLEC review) via the "Extract Return File" process.....	35
17	Billing Completeness.....	37
17.1	Service Order Posting.....	39
18	Mechanized Electronic Billing Timeliness EDI and BDT (Wholesale Bill).....	40
19	Daily Usage Feed Timeliness	41
C.	Miscellaneous Administrative.....	42
	Performance Measurement Numbers:	
22	Local Service Center (LSC) Grade of Service (GOS).....	42
23	Percent Busy in the Local Service Center (LSC) (Deleted Effective 7/1/01).....	43
25	Local Operations Center (LOC) Grade of Service (GOS).....	44
26	Percent Busy in the Local Operations Center (LOC) (Deleted Effective 7/1/01).....	45

II. RESALE POTS AND UNE LOOP AND PORT COMBINATIONS COMBINED BY SWBT	46
A. Provisioning	46
Performance Measurement Numbers:	
27 Mean Installation Interval	46
28 Percent POTS/UNE-P Installations Completed Within the customer requested due date	48
29 Percent SWBT Caused Missed Due Dates	50
30 Percent Company Missed Due Dates Due To Lack Of Facilities	51
31 Average Delay Days For Missed Due Dates Due To Lack Of Facilities (Deleted Effective 7/1/01)	52
32 Average Delay Days For SWBT Caused Missed Due Dates	53
35 Percent POTS/UNE-P Trouble Report Within 10 Days (I-10) of Installation	54
35.1 Percent UNE-P Trouble Reports On the Completion Date	56
36 Percent No Access (Service Orders With No Access) (Deleted Effective 7/1/01)	57
B. Maintenance	58
Performance Measurement Numbers:	
37 Trouble Report Rate	58
37.1 Trouble Report Rate net of installation and repeat reports	59
38 Percent Missed Repair Commitments	60
39 Mean time to restore	61
40 Percent Out Of Service (OOS) <24 Hours	62
41 Percent Repeat Reports	63
III. RESALE SPECIALS AND UNE LOOP AND PORT COMBINATIONS COMBINED BY SWBT (EXCLUDES “ACCESS” ORDERS)	64
A. Provisioning	64
Performance Measurement Numbers:	
43 Average Installation Interval	64
44 Percent (Specials) Installations Completed Within the Customer Requested Due Date	65
45 Percent SWBT Caused Missed Due Dates	66
46 Percent Installation Reports (Trouble Reports) Within 30 Days (I-30 of Installation)	67
47 Percent Missed Due Dates Due To Lack Of Facilities	68
48 Delay Days for Missed Due Dates Due to Lack Of Facilities (Deleted Effective 7/1/01)	69
49 Delay Days For SWBT Caused Missed Due Dates	70
B. Maintenance	71
Performance Measurement Numbers:	
52 Mean Time to Restore	71
53 Percent Repeat Reports	72
54 Trouble Report Rate	73
54.1 Trouble Report Rate - Net of installation and repeat reports (New Measurement)	74
IV. UNBUNDLED NETWORK ELEMENTS (UNES)	75
A. Provisioning	75
Performance Measurement Numbers:	
55 Average Installation Interval	75
55.1 Average Installation Interval – DSL	77

55.2	Average Installation Interval for Loop With LNP	79
55.3	Percent xDSL-capable loop orders requiring the removal of load coils and or repeaters	81
55.4	Percent Provisioning Trouble Reports (PTR) on Line Sharing Orders	82
55.5	Loop Acceptance Testing (LAT Completed)	83
56	Percent (UNEs) Installations Completed Within the Customers Requested Due Date	84
56.1	Percent Installations Completed within the Customer Requested due Date for LNP with Loop	86
58	Percent SWBT Caused Missed Due Dates	87
59	Percent Installation Reports (Trouble Reports) Within 30 Days (I-30) of Installation	89
60	Percent Missed Due Dates Due To Lack Of Facilities	91
61	Average Delay Days For Missed Due Dates Due to Lack Of Facilities (Deleted Effective 7/1/01)	92
62	Average Delay Days For SWBT Caused Missed Due Dates	93
63	Percent SWBT Caused Missed Due Dates >30 Days (Deleted Effective 7/1/01)	95
B.	Maintenance	96
	Performance Measurement Numbers:	
65	Trouble Report Rate	96
65.1	Trouble Report Rate net of installation and repeat reports	98
66	Percent Missed Repair Commitments	100
67	Mean Time To Restore	101
69	Percent Repeat Reports	103
V.	INTERCONNECTION TRUNKS	105
	Performance Measurement Numbers:	
70	Percentage of Trunk Blockage	105
70.1	Trunk Blockage Exclusions	107
71	Common Transport Trunk Blockage	108
72	Distribution Of Common Transport Trunk Groups > 2%/1% (Deleted Effective 7/1/01	109
73	Percentage of Installations Completed Within the Customer Requested Due Date	110
73.1	Percentage Held Interconnection Trunks	112
74	Average Delay Days For Missed Due Dates – Interconnection Trunks	113
76	Average Trunk Restoration Interval – Interconnection Trunks	114
77	Average Trunk Restoration Interval for Service Affecting Trunk Groups	115
VI.	DIRECTORY ASSISTANCE (DA) AND OPERATOR SERVICES (OS)	116
	Performance Measurement Numbers	
80	Directory Assistance Average Speed Of Answer (Deleted Effective 7/1/01)	116
82	Operator Services Speed Of Answer (Deleted Effective 7/1/01)	117
VII.	LOCAL NUMBER PORTABILITY (LNP)	118
	Performance Measurement Numbers:	
91	Percentage of LNP Only Due Dates Within Industry Guidelines	118
92	Percentage of Time the Old Service Provider Releases the Subscription Prior to the Expiration of the Second 9 Hour (T2) Timer	119
93	Percentage of Customer Account Restructured Prior to LNP Due Date	120
96	Percentage Pre-mature Disconnects for Stand alone LNP Orders	121
97	Percentage of Time SWBT Applies the 10-digit Trigger Prior to the LNP Order Due Date	122

98	Percentage Stand Alone LNP I-Reports in 10 Days	123
99	Average Delay Days for SWBT Missed Due Dates for Stand Alone LNP Orders	124
100	Average Time of Out of Service for LNP Conversions (Deleted Effective 7/1/01)	125
101	Percent Out of Service < 60 minutes	125
VIII.	911	127
	Performance Measurement Numbers:	
102	Average Time To Clear Errors	127
103	Percent Accuracy for 911 Database Updates (Facility Based Providers)	128
104	Average Time Required to Update 911 Database (Facility Based Providers)	129
104.1	The average time it takes to unlock the 911 record	130
IX.	POLES, CONDUIT AND RIGHTS OF WAY	131
	Performance Measurement Numbers:	
105	Percent of requests processed within 35 Days	131
106	Average Days Required to Process a Request (Deleted Effective 7/1/01)	132
X.	COLLOCATION	133
	Performance Measurement Numbers:136	
107	Percentage Missed Collocation Due Dates	133
108	Average Delay Days for SWBT Missed Due Dates	135
109	Percent of Requests Processed Within the Tariffed Timelines	136
XI.	DIRECTORY ASSISTANCE DATABASE	137
	Performance Measurement Numbers:	
110	Percentage of Updates Completed into the DA Database Within 72 Hours for Facility Based CLECs	137
111	Average Update Interval for DA Database for Facility Based CLECs (Deleted Effective 7/1/01)	138
112	Percentage DA Database Accuracy For Manual Updates	139
113	Percentage of Electronic Updates that Flow Through the DSR Process Without Manual Intervention	140
XII.	COORDINATED CONVERSIONS	141
	Performance Measurement Numbers:	
114	Percentage of Premature Disconnects for CHC/FDT LNP with Loop Lines	141
114.1	CHC/FDT LNP with Loop Provisioning Interval	142
114.2	CHC/FDT For DSL Loops and Line Sharing (Placeholder for future use)	144
115	Percent Provisioning Trouble Reports (PTR)	145
115.1	Mean Time To Restore - Provisioning Trouble Report (PTR)	146
115.2	Percentage of CHC/FDT LNP with Loop Lines Combined Averager (New Measure)	147
XII.	NXX	148
	Performance Measurement Numbers:	
117	Percent NXXs loaded and tested prior to the LERG effective date	148
118	Average Delay Days for NXX Loading and Testing	149
XIV.	BONA FIDE/SPECIAL REQUEST PROCESS (BFRs)	150

Performance Measurement Numbers:

120	Percentage of Requests Processed Within 30 Business Days.....	150
121	Percentage of Quotes Provided for Authorized BFRs/Special Requests Within X (10, 30, 90) Days	151
123	Percent of Timely and Compliant Change Management Notices.....	152
124	Timely resolution of significant Software Failures related with Releases	154

XV. GENERAL BUSINESS RULES (APPLICABLE TO ALL MEASURES EXCEPT AS SPECIFICALLY NOTED	155
A. Reporting of Exclusions.....	155
B. Geographic Market Regions	155
Appendix One.....	156
Appendix Two	157
Appendix Three.....	158
Appendix Four	159
Appendix Five.....	161

PERFORMANCE MEASUREMENTS BUSINESS RULES (VERSION 2.0)

I. RESALE POTS, RESALE SPECIALS AND UNES

A. Pre-Ordering/Ordering

PM 1 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

1.1. Measurement (Formerly PM 57)	
Average Response Time for Manual Loop Make-Up Information	
Definition:	
The average time required to provide manual loop qualification for xDSL capable loops measured in business days.	
Exclusions:	
<ul style="list-style-type: none"> Manual requests for Loop Makeup Information not initiated by the CLEC; however, manual requests initiated by the LSC as part of the ordering process when no mechanized loop qualification data is available will be included. 	
Business Rules:	
<p>For a DataGate/EDI/CORBA or Verigate initiated request, the start date and time is when the request is received in the Loop Qual System. The end date and time for the DataGate/EDI/CORBA or Verigate request is when the loop makeup information has either has been e-mailed back to the CLEC or, if the CLEC does not want email, is available in the Loop Qual System.</p> <p>For manual requests for Loop Makeup Information initiated by the LSC as part of the ordering process, the start date and time is the receipt date and time of the good LSR. The end date and time is when the loop makeup information is available in the Loop Qual System.</p> <p>SWBT will provide raw data to CLECS in an agreed to format, on a monthly basis, without the need for a request from a CLEC, until such time as both parties agree it is no longer necessary.</p>	
Levels of Disaggregation:	
<ul style="list-style-type: none"> None 	
Calculation:	Report Structure:
$\Sigma(\text{Date and Time the Loop Qualification is made available to CLEC} - \text{Date and Time the CLEC request is received}) / \text{Total number of loop qualifications}$	By CLEC, All CLECs and SWBT or its affiliates (or SWBT acting on behalf of its' affiliate).
Measurement Type:	
Tier 1 – Low Tier 2 – Medium	
Benchmark:	
3 business days, Critical z-value applies.	

1.2 Measurement	
Accuracy of Actual Loop Makeup Information Provided for DSL Orders	
Definition:	
The percent of accurate DSL actual Loop Makeup Information provided to the CLEC.	
Exclusions:	
None	
Business Rules:	
This measurement tracks accuracy of the loop makeup information provided to the CLEC. It compares reported loop makeup information to actual loop makeup information on the loop provided to the CLEC, and it captures both the clerical error and underlying data error.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • DSL actual Loop Makeup Information provided manually • DSL actual Loop Makeup Information provided electronically 	
Calculation:	Report Structure:
(# of orders for which Loop makeup information provided by SWBT is identical to engineering work confirmation/DLR ÷ total actual Loop Makeup Information responses) * 100	Reported on a CLEC, all CLECs, SWBT DSL affiliate, and SWBT DSL Retail basis by interface for EDI, DATAGATE, VERIGATE, or manually, depending on method of provision of actual loop makeup information.
Measurement Type:	
Tier 1 – Low Tier 2 – Medium	
Benchmark:	
95% No critical-z applies.	

2. Measurement
Percent Responses Received within “X” seconds – OSS Interfaces
Definition:
The percent of responses completed in “x” seconds for pre-order interfaces (Verigate and DataGate/EDI/CORBA,)by function.
Exclusions:
<ul style="list-style-type: none"> • None
Business Rules:
<p>The clock starts on the date/time when the request is received by SWBT, and the clock stops on the date/time when SWBT has completed the transmission of the response to the CLEC. Timestamps are taken at the DataGate and Verigate servers and do not include transmission time through the LRAF. Response time is accumulated for each major query type, and then divided by the associated total number of queries received by SWBT during the reporting period. The response time is measured only within the published hours of interface availability. Published hours of interface availability are documented on the CLEC web site. (SWBT will not schedule system maintenance during normal business hours (8:00 a.m. to 5:30 p.m. Monday through Friday). If the CLEC accesses SWBT systems using a Service Bureau Provider, the measurement of SWBT's performance does not include Service Bureau Provider processing, availability or response time.</p> <p>For the protocol translation response times, start and end times are as follows:</p> <p>EDI input time starts at the time the CLEC successfully connects to the EDI Interactive Agent and the end time is when the connection is made to DataGate for processing. EDI output time starts when the response message is received from DataGate and the end time is when the message is sent to the CLEC. CORBA input time starts at the time the message is received by the CORBA interface and the end time is when the connection is made to DataGate for processing. CORBA output time starts when the response message is received from DataGate and the end time is when the message is sent to the CLEC</p>
Levels of Disaggregation:

Address Verification

- Request For Telephone Number
- Request For Summary Customer Service Record (CSR) <= 30 WTNs (Also broken down for Lines as required for DIDs).
- Request For Summary Customer Service Record (CSR) > 30 WTNs (Also broken down for Lines as required for DIDs).
- Request for Detailed Customer Service Request (CSR)
- Service Availability
- Service Appointment Scheduling (Due Date)
- Dispatch Required
- PIC
- Actual Loop Makeup Information requested - actual data returned
- Actual Loop Makeup Information requested - design data returned
- Design Loop Makeup Information requested - design data returned
- Protocol translation time – EDI input messages
- Protocol translation time – EDI output messages
- Protocol translation time – CORBA input messages
- Protocol translation time – CORBA output messages

Calculation:		Report Structure:
(# of responses within each time interval ÷ total responses) * 100		Reported on a CLEC, all CLECs, and SWBT affiliate where applicable (or SWBT acting on behalf of its' affiliate), by interface.
Measurement Type:		
Tier 1 – Low Tier 2 – Medium		
Benchmark:		
Benchmarks for summary CSR applies to <= 30 WTNs. Benchmarks for Loop Makeup Information are interim until parties agree that sufficient data is available to set final benchmarks. No damages will apply for Loop Makeup Information until final benchmarks are set. No damages will apply to the Protocol Translation Times for EDI. Critical z-value does not apply.		
Measurement	DataGate/EDI/COR BA	Verigate
Address Verification	90% in = 8.0 seconds 95% in = 12.0 seconds	80% in = 5.0 seconds 90% in = 7.0 seconds
Request For Telephone Number	90% in = 7.0 seconds 95% in = 9.5 seconds	80% in = 4.0 seconds 90% in = 6.0 seconds
Request For Customer Service Record (CSR)	90% in = 8.0 seconds 95% in = 13 seconds	80% in = 7.0 seconds 90% in = 10.0 seconds

Service Availability	90% in = 12.0 seconds 95% in = 16.0 seconds	80% in = 11.0 seconds 90% in = 13.0 seconds
Service Appointment Scheduling (Due Date)	90% in = 2 seconds 95% in = 3.0 seconds	80% in = 2.0 seconds 90% in = 3.0 seconds
Dispatch Required	90% in = 15.0 seconds 95% in = 25.0 seconds	80% in = 17.0 seconds 90% in = 19.0 seconds
PIC	90% in = 27.0seconds 95% in = 41.0 seconds	80% in = 25.0 seconds 90% in = 27.0 seconds
Actual Loop Makeup Information requested – actual data returned	90% in = 15.0 seconds 95% in = 25.0 seconds	80% in = 17.0 seconds 90% in = 19.0 seconds
Actual Loop Makeup Information requested – design data returned	90% in = 25.0 seconds 95% in = 35.0 seconds	80% in = 27.0 seconds 90% in = 29.0 seconds
Design Loop Makeup Information requested – design data returned	90% in = 11.9 seconds 95% in = 20.0 seconds	80% in = 13.5 seconds 90% in = 15.0 seconds
Protocol Translation Time – EDI input message	90% in = Diagnostic 2 Seconds 95% in = Diagnostic 4 Seconds	Not Applicable
Protocol Translation Time – EDI output message	90% in = Diagnostic 2 Seconds 95% in = Diagnostic 4 Seconds	Not Applicable
Protocol Translation Time – CORBA input message	90% in = 1 second 95% in = 2 seconds	Not Applicable
Protocol Translation Time – CORBA input message	90% in = 1 second 95% in = 2 seconds	Not Applicable

4. Measurement	
OSS Interface Availability	
Definition:	
Percent of time OSS interface is available compared to scheduled availability.	
Exclusions:	
<ul style="list-style-type: none"> • None 	
Business Rules:	
<p>The total “number of hours functionality to be available” is the cumulative number of hours (by date and time on a 24 hour clock) over which SWBT plans to offer and support CLEC access to SWBT’s operational support systems (OSS) functionality during the reporting period. “Hours Functionality is Available” is the actual number of hours, during scheduled available time, that the SWBT interface is capable of accepting or receiving CLEC transactions or data files. The actual time available is divided by the scheduled time available and then multiplied by 100 to produce the “Percent system availability” measure. SWBT will not schedule normal maintenance during OSS Hours of availability as posted on the CLEC web site unless otherwise notified via an accessible letter. SWBT will not schedule normal maintenance during business hours (8:00 a.m. to 5:30 p.m. Monday through Friday). When interfaces experience partial unavailability, an availability factor is applied to the calculation of downtime. This factor is stated as a percentage and represents the impact to the CLEC. Determination of the availability factor is governed by SWBT’s Availability Team on a case by case basis. Disputes related to application of the availability factor may be presented to the Commission. Whenever an interface experiences complete unavailability to a CLEC, the full duration of the unavailability will be counted, to the nearest minute, and no availability factor will be applied. SWBT shall calculate the availability time rounded to the nearest minute.</p>	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • EASE reported for Consumer and Business • EDI reported by protocol (SSL3, FTP, NDM, VAN) • EDI/CORBA for Pre-order • DataGate • Verigate • LEX • RAF – By CLEC • TOOLBAR • <u>Order Status</u> • <u>Trouble Administration</u> • <u>Provisioning Order Status</u> • <u>Solid GUI (Diagnostic)</u> 	
Calculation:	Report Structure:
$\frac{[(\text{Hours functionality is available during the scheduled available hours}) \div \text{Scheduled system available hours}]}{* 100}$	<p>Reported on an aggregate CLEC basis by interface. The RAF will be reported on an individual CLEC basis.</p>

Measurement Type:
Tier 1 – None Tier 2 – High
Benchmark:
99.5%. The critical z allowance does not apply on this measurement. No damages are applicable for Solid GUI. This will be reviewed in 6 months

PM 4.1 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

5. Measurement:

Percent Firm Order Confirmations (FOCs) Returned on time for LSR requests.

Definition:

Percent of FOCs returned to the CLEC within a specified time frame from receipt of a complete and accurate service request to return of confirmation to CLEC.

Exclusions:

- Rejected (manual and electronic) LSRs.
- SWBT only Disconnect orders.
- Services ordered out of the Access Tariff
- Interconnection Orders (See PM 5.2)
- Unbundled Dedicated Transport Orders (See PM 5.2)

Business Rules:

FOC business rules are established to reflect the Local Service Center (LSC) normal hours of operation, which include Monday through Friday, 8:00 a.m. to 5:30 p.m., excluding holidays and weekends. If the start time is outside of normal business hours, then the start date/time is set to 8:00 a.m. on the next business day. Example: If the request is received Monday through Friday between 8:00 a.m. to 5:30 p.m.; the valid start time will be Monday through Friday between 8:00 a.m. to 5:30 p.m. If the actual request is received Monday through Thursday after 5:30 p.m. and before 8:00 a.m. the next day; the valid start time will be the next business day at 8:00 a.m. If the actual request is received Friday after 5:30 p.m. and before 8:00 a.m. Monday; the valid start time will be at 8:00 a.m. Monday. If the request is received on a holiday (anytime); the valid start time will be the next business day at 8:00 a.m. For LSRs received electronically requiring no manual intervention by the LSC, the OSS hours of operation will be used in lieu of the LSC hours of operation (i.e., actual OSS processing time outside of LSC hours will not be excluded in calculating the interval). The returned confirmation to the CLEC will establish the actual end date/time. Provisions are established within the DSS reporting systems to accommodate situations when the LSC works holidays, weekends, and when requests are received outside normal working hours. For UNE Loop and Port combinations, orders requiring N, C, and D orders; the FOC is sent back at the time the last order that establishes service is distributed.

All UNE P orders are categorized as Simple or Complex in the same manner as Retail or Resale orders are categorized. All orders that flow through EASE are categorized as Simple and all orders that do not flow through EASE are categorized as Complex.

A Mechanized Business Ordering system (MBOS) document is also required for engineering of trunks that must take place prior to the request being worked.. The MBOS form must be initiated by the LSC service representative with information from the LSR for services such as Centrex, DIDs, Plexar I, Package II, Plexar II Basic, Plexar Custom Basic, and PRI services such as Smart Trunks,

Select Video, etc. Once the MBOS form is completed, the LSC service representative must release it to the other involved departments for review and determination of the design information and to determine the necessary steps to provide the services. This may involve review of TN number availability, design circuit provisioning, translations requirements, etc. to determine the service availability and due date. Depending on the service and complexity of the request, the return of the MBOS could be 3-5 days. Therefore, the FOC is to be negotiated for any services that require an MBOS.

If the CLEC accesses SWBT systems using a Service Bureau Provider, the measurement of SWBT's performance does not include Service Bureau Provider processing, availability or response time.

LEX/EDI

For LEX and EDI originated LSRs, the start date and time is the receive date and time that is automatically recorded by the interface (EDI or LEX) with the system date and time. The end date and time is recorded by the interface (EDI or LEX) and reflects the actual date and time the FOC is available to the CLEC. For LSRs where FOC times are negotiated with the CLEC, the ITRAK entry on the SORD service order is used in the calculation.

MANUAL REQUESTS

Manual service order requests are those initiated by the CLEC either by telephone, fax, or other manual methods (i.e. courier). The fax receipt date and time is recorded and input on the SM-FID on each service order in SORD for each FOC opportunity. The end time is the actual date and time that a successful attempt to send a paper fax, is made back to the CLEC. If a CLEC does not require a paper fax the FOC information is provided over the phone. In these instances, the order distribution time is used as the FOC end date and time. If a CLEC chooses to receive their FOCs via the Website, the end time is the date and time the FOC is loaded to the Website. The ITRAK-FID is used when FOC times are negotiated with the CLEC. The LSC populates the ITRAK-FID with certain pre-established data entries that are used in the FOC calculation.

Levels of Disaggregation:

Electronic/Electronic

- Resale (residential and simple business combined)
- UNE-P (POTS loop/port combinations)
- UNE loop (excluding DSL loops), with or without LNP
- DSL capable loops (including standalone loops, line sharing and line splitting)
- LNP only
- All other

Manual Intervention

- Resale (residential and simple business combined)
- UNE-P (POTS loop/port combinations)
- UNE loop (excluding DSL loops), with or without LNP
- DSL capable loops (including standalone loops, line sharing and line splitting)

- LNP only
- All Other (Includes order types that require manual submission)

Calculation:	Report Structure:
$(\# \text{ FOCs returned within "x" hours} \div \text{total FOCs sent}) * 100$	Reported by CLEC, all CLECs, and SWBT affiliate where applicable (or SWBT acting on behalf of its' affiliate). This includes mechanized from EDI and LEX and manual (e.g. FAX or phone orders).
Measurement Type:	
<p>Tier 1* – Low Tier 2* – Medium</p> <p>* Penalties would be assessed at the following levels:</p> <ul style="list-style-type: none"> • Electronic/Electronic • Manual Intervention: Resale • Manual Intervention: UNE-P • Manual Intervention: UNE Loop • Manual Intervention: DSL Capable Loops • Manual Intervention: LNP only • Manual Intervention: All Other (Includes order types that require manual submission) <p>(NOTE: SWBT shall not be liable for tier-2 damages for tail violations, however SWBT shall continue to report the tail data.)</p>	
Benchmark:	
<p>Electronic – Electronic 95% within 60 minutes.</p> <p>Manual Intervention - 95% within the benchmark defined below:</p> <p>Within 5 Hours for the following service types:</p> <ul style="list-style-type: none"> • Mechanized Simple Res/Bus/Mechanized UNE Loop (1-49)/Mechanized Switch Ports/ Mechanized LNP with Loop (1-19) <p>Within 6 Hours for the following service types:</p> <ul style="list-style-type: none"> • Mechanized UNE xDSL Capable Loop (1-20)/Mechanized Line Sharing (1-49) <p>Within 14 Hours for the following service types:</p> <ul style="list-style-type: none"> • Mechanized UNE xDSL Capable Loop (> 20)/Mechanized Line Sharing (>49) <p>Within 24 Hours for the following service types:</p> <ul style="list-style-type: none"> • Manual and Mechanized Complex Bus (1-200)/ Manual and Mechanized LNP Complex Business (1-19)/Manual Simple Res./Bus/Manual UNE Loop(1-49)/Manual Switch Ports/ Manual LNP with Loop (1-19)/ Manual LNP Complex Business (1- 	

19)/Manual UNE xDSL Capable Loop (1-49)/Manual Line Sharing (1-49)

Within 48 Hours for the following service types:

- Manual and Mechanized Complex Bus (>200)/Manual and Mechanized UNE Loop (>50)/ Manual and Mechanized LNP Complex Business (20-50 Lines)/ Manual and Mechanized LNP with Loop (>20)/Manual UNE xDSL Capable Loop (> 49)/ Manual Line Sharing (>49)

Within the Negotiated interval for the following service types:

- Manually and Mechanized LNP Complex Business (>50)/ MBOS related services (Centrex, Plexar I Pkg II, Plexar II, Plexar Custom Basic, and DID Trunks (1-200 lines)) < Negotiated with Notification of Timeframe within 24 Clock Hours

The critical-z does not apply to this measure.

Tails Test: Average for the last 5% will not exceed 20% of the benchmark. A weighted average will be used for the manual categories where there are more than one time interval. The weighted average will be compared to a weighted benchmark to determine if the tails test has been met.

$\Sigma[(\text{Average} * \text{interval})(X \text{ FOCs in Tail} / \text{Total FOCs in Tail})]$ compared to $\Sigma[(X \text{ interval benchmark})(1.2)(X \text{ FOCs in Tail} / \text{Total FOCs in Tail})]$

Tails Test only applies to Tier 1 and only if SWBT has met the benchmark on the corresponding “percent within x” measurement.

PM 5.1 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

5.2 Measurement:	
Percent Firm Order Confirmations (FOCs) Returned within X days on ASR requests	
Definition:	
Percent of FOCs returned within a specified time frame from receipt of a complete and accurate service request to return of confirmation to CLEC.	
Exclusions:	
<ul style="list-style-type: none"> • All LSRs • Access Orders purchased from SWB tariffs • Rejected (manual and electronic) ASRs. • SWBT only Disconnect orders. 	
Business Rules:	
<p>FOC business rules are established to reflect the Local Service Center (LSC) normal hours of operation, which include Monday through Friday, 8:00 a.m.-5:30 p.m., excluding holidays and weekends. If the start time is outside of normal business hours, then the start date/time is set to 8:00 a.m. on the next business day. Example: If the request is received Monday through Friday between 8:00 a.m. to 5:30 p.m.; the valid start time will be Monday through Friday between 8:00 a.m. to 5:30 p.m. If the actual request is received Monday through Thursday after 5:30 p.m. and before 8:00 a.m. the next day; the valid start time will be the next business day at 8:00 a.m. If the actual request is received Friday after 5:30 p.m. and before 8:00 a.m. Monday; the valid start time will be at 8:00 a.m. Monday. If the request is received on a holiday (anytime); the valid start time will be the next business day at 8:00 a.m. The returned confirmation to the CLEC will establish the actual end date/time. Provisions are established within the DSS reporting systems to accommodate situations when the LSC works holidays, weekends, and when requests are received outside normal working hours.</p>

B. Billing

14. Measurement	
Billing Accuracy	
Definition:	
SWBT performs three bill audits to ensure the accuracy of the bills rendered to its customers: CRIS, CABS and toll/usage.	
Exclusions:	
Non-recurring charges are not part of the CRIS audit process, as SWBT has developed a test order process to ensure the accuracy of CRIS non-recurring charges.	
Business Rules:	
The purpose of the CRIS Bill Audit is to review and recalculate each service billed for each of the seven bill processing centers in the five states. Wholesale accounts are included in each processing center for every billing period. In the toll/usage bill audit, a sample of customer accounts is selected using an appropriate mix of USOCs and Classes of Service. The purpose of this audit is to ensure that monthly bills sent to the CLECs, whether it is for resale or unbundled services, and retail customers are rated accurately according to tariffs and CLEC contracts. For all accounts that are audited, the number of bills that have been released prior to correction (bills are audited for complete information, accurate calculations and are properly formatted) are counted as an error against the total bills audited.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> CLEC and non-CLEC 	
Calculation:	Report Structure:
(# of bills not corrected prior to bill release ÷ total bills audited) * 100	Reported for aggregate of all CLECs and SWBT for the CRIS, CABS and Usage bill audits.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:

15. Measurement	
Percent of Accurate and Complete Formatted Mechanized Electronic Bills via EDI or BDT	
Definition:	
The percent of monthly bills sent to the CLECs via the mechanized electronic EDI or BDT process that are accurate and complete. SWBT will consider, upon review, adding new electronic processes that may be developed in the future"	
Exclusions:	
<ul style="list-style-type: none"> • None 	
Business Rules:	
<p>EDI Billing accuracy is based upon three factors: totaling, formatting, and syntax. In other words, does the bill total up correctly, does the EDI Billing data conform to the format outlined in the SWB Electronic Commerce Guide for EDI Billing, and is the EDI Billing data syntactically correct. For completeness, EDI checks that the sum of all itemized calls equals the total for the itemized calls bill section, and the sum of all OC&C charges should equal the total for the OC&C section. Similar audits are performed for total current charges and the amount due.</p> <p>BDT Billing accuracy is based upon three factors: totaling, formatting, and syntax. In other words, does the bill total up correctly, does the BDT Billing data conform to the Billing Output Specifications (BOS) format, and is the BDT Billing data syntactically correct? For completeness, BDT checks that the sum of all itemized calls equals the total for the itemized calls bill section, and the sum of all OC&C charges should equal the total for the OC&C section. Similar audits are performed for total current charges and the amount due.</p>	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • EDI • BDT • To the extent SWBT sends bills to CLECs using application to application processes other than EDI or BDT, SWBT will include those bills in this measure, separately disaggregated or not, as appropriate, with notice to CLECs of the change. 	
Calculation:	Report Structure:
(Count of accurate and complete formatted mechanized electronic bills via EDI/BDT ÷ total # of mechanized electronic bills via EDI/BDT.) * 100	Reported for CLEC and all CLECs and ASI where applicable

Measurement Type:
Tier 1 – Low Tier 2 – High
Benchmark:
99% Critical z-value does not apply for EDI, Critical z-value applies for BDT.

16. Measurement:

Percent of Accurate Usage Records transmitted (of those records that are subject to active CLEC review) via the “Extract Return File” process.

Definition:

For those CLECs who agree to utilize the “Extract Return Process,” this measure identifies the usage records transmitted, within a given month, by SWBT to the CLECs on the Daily Usage extract feed that have been identified by the CLECs as being inaccurate. The CLECs would return these inaccurate records (preferably within the same month) via the “Extract Return File” process to SWBT. SWBT would then be responsible for validating that these records or a portion of these records were, indeed, transmitted inaccurately. CLECs will have an opportunity to contest any determination by SWBT that a record identified by a CLEC as inaccurate should be considered accurate.

Exclusions:

- Records that are classified as category “01” (the first two digits of the EMI record) which are rated records provided by other companies for SWBT to transmit via the Daily Usage Extract feed to the CLECs
- Category “11” records until such time that the industry has established a return code standard through the OBF forum
- Usage records that are not returned within 30 days via the “Extract Return File
- Usage records transmitted to CLECs who do not affirmatively agree to utilize the “Extract Return File” process.

Business Rules:

Controls and edits within the billing system uncover certain types of errors that are likely to appear on the usage records. When these errors are uncovered, a new release of the program is written to ensure that the error does not occur again. Thus, an error that is reported in one month should not occur the next month because the billing program error would have been fixed by the next month.

In addition, records identified as inaccurate by the CLECs should be returned to SWBT via the “Extract Return File” process. SWBT will 30 days to validate and correct these records or a portion of these records (as appropriate) and retransmit them to the CLECs. SWBT will be held liable only for the records that have been validated as being inaccurate out of the total number of records returned by the participating CLECs. It is possible that through the validation processes, SWBT may determine that none of the records returned are inaccurate. In that case, SWBT will notify the CLEC of its determination. If the parties cannot agree on the correct determination, either party may invoke dispute resolution..

Levels of Disaggregation:

- None

Calculation:	Report Structure:
(Total usage records transmitted– total usage records returned by the CLECs via the “Extract Return File” process and validated to be inaccurate) ÷ total usage records transmitted) * 100	Reported for CLEC and all CLECs.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
95% Critical z-value applies	

17. Measurement
Billing Completeness
Definition:
Percent of service orders completed within the billing cycle that post in the CRIS or CABS billing systems prior to the CLECs bill period.
Exclusions:
<ul style="list-style-type: none"> • Access Service Orders billed through CABS. • Interconnection Trunk Orders
Business Rules:
<p>The Billing Completeness Measure includes all orders and is created from the Posted Service Order Database (PSOD). PSOD includes copies of all posted service orders for both the CRIS and CABS. PSOD includes the Bill Period, Completion Date, and Post Date for each Service Order as well as an On-Time/Late indicator created based on these dates. This On-Time/Late indicator is calculated as follows:</p> <ol style="list-style-type: none"> 1. Determine the Bill Date, Completion Date, and Post Date for any order that has an OCN number regardless of order type. 2. Calculate the Bill Date minus one month by subtracting one month from the Bill Date. 3. Determine the Bill Render Date by using the Bill Date to look up the Bill Render Date on the Bill Period Calendar. 4. Compare the Completion Date, Bill Date, Bill Date Minus one month, Bill Render Date, and Post Date of the service order to determine if order is on-time or late: <ul style="list-style-type: none"> • If the Completion Date of the service order is prior to the Bill Date minus one month, then the order is late. • Compare the Post Date to the Bill Render Date. If the Post Date is earlier than or equal to the Bill Render Date and the Completion Date of the service order is equal to or greater than the Bill Date minus one month, then the order is on time. • In all other cases, the order is late. • The Billing Completeness Measure for each month is based on all orders that post within that given month. The denominator of the measure is all orders within a month. The numerator is the total number of on-time orders for that same month. The Billing Completeness Measure calculation is completed for each CLEC, for all CLECs, and for all retail service orders. The CLEC orders for both CRIS and CABS are defined as all service orders that include the AECN or OCN FID. The retail orders are all CRIS orders that do not include an AECN.
Levels of Disaggregation:

45. Measurement	
Percent SWBT Caused Missed Due Dates	
Definition:	
Percentage of N, T, and C orders by circuit where installations were not completed by the due date or were canceled after the due date that were caused by SWBT.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunks. • Excludes orders that are not N, T, or C. • Excludes customer caused misses. 	
Business Rules:	
The Due Date is the negotiated date that is returned on the FOC by SWBT for service activation. The Completion Date is the day that SWBT personnel complete the service order activity. This measure includes in both the numerator and the denominator the number of orders canceled after a SWBT-caused missed due date. The source is WFA (Work Force Administration) and data is reported at a circuit level. Specials are selected based on a specific service code off of the circuit ID.	
Levels of Disaggregation:	
See Measurement No. 43	
Calculation:	Report Structure:
(Count of circuits with missed due dates or were canceled after the due date that were caused by SWBT excluding customer caused misses ÷ total number of circuits and those that were canceled after the due date that were caused by SWBT) * 100	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
Parity with SWBT Retail.	

46. Measurement	
Percent Installation Reports (Trouble Reports) Within 30 Days (I-30) of Installation	
Definition:	
Percent of N, T, and C orders by circuit that receive a customer trouble report within 30 calendar days of service order completion.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunks. • Excludes orders that are not N, T, or C. • Excludes trouble report received on the due date before service order completion. • Excludes trouble tickets that are coded to Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational 	
Business Rules:	
A trouble report is counted if it is flagged on WFA (Work Force Administration) as a trouble report that had a service order completion within 30 days. It cannot be a repeat report. The order flagged against must be an addition in order for the trouble report to be counted. Specials are selected based on a specific service code off of the circuit ID. . The denominator for this measure is the total count of orders posted within the reporting month. (However, the denominator will at a minimum equal the numerator). The numerator is the number of trouble reports received within 30 days of service order completion and closed within the reporting month	
Levels of Disaggregation:	
See Measurement No. 43	
Calculation:	Report Structure:
[Count of circuits that receive a customer trouble report within 30 calendar days of service order completion ÷ total circuits (excludes trouble reports received on the due date)]* 100	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
Parity with SWBT Retail.	

47. Measurement	
Percent Missed Due Dates Due To Lack Of Facilities	
Definition:	
Percentage of N, T, and C orders by circuit with missed committed due dates due to lack of facilities.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunks. • Excludes orders that are not N, T, or C. 	
Business Rules:	
The Due Date starts the clock. The Completion Date is the day that SWBT personnel complete the service order activity, which stops the clock. The source is WFA (Work Force Administration) and is at an item or circuit level. Specials are selected based on a specific service code off of the circuit ID and by selected center names that indicate resale. The lack of facilities is selected based on the missed reason code.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • See Measurement No. 43 • 	
Calculation:	Report Structure:
(Count of circuits with missed committed due dates due to lack of facilities ÷ total circuits) * 100	Reported for Specials Resale by CLEC, all CLECs and SWBT Retail.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
Parity with SWBT Retail.	

PM 48 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

49. Measurement	
Delay Days For SWBT Caused Missed Due Dates	
Definition:	
Average calendar days from due date to completion date on company missed circuit orders.	
Exclusions:	
<ul style="list-style-type: none"> • Excludes UNE and Interconnection Trunks. • Excludes orders that are not N, T, or C. • Excludes Customer Caused Misses 	
Business Rules:	
The calculation is the difference in calendar days between the completion date and the due date. The source is WFA (Work Force Administration) and is reported at a circuit level. Specials are selected based on a specific service code off of the circuit ID.	
Levels of Disaggregation:	
See Measurement No. 43	
Calculation:	Report Structure:
$\Sigma(\text{Completion date} - \text{committed circuit due date}) \div (\# \text{ of posted} - \text{circuits with a SWBT caused missed due date})$	Reported by CLEC, all CLECs and SWBT Retail Specials.
Measurement Type:	
Tier 1 – Medium Tier 2 – None	
Benchmark:	
Parity with SWBT Retail.	

B. Maintenance

NOTE: Specials are all treated as Out of Service repair reports. There is no classification or disaggregation of Affecting Service.

52. Measurement	
Mean Time To Restore	
Definition:	
Average duration in calendar days of customer trouble reports from the receipt of the customer trouble report to the time the trouble report is cleared.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunk. • No Access Time. • Delayed Maintenance Time. • Excludes trouble tickets that are coded to Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational 	
Business Rules:	
The start time is when the customer report is received and the stop time is when the report is closed. Specials are selected based on a specific service code off of the circuit ID.	
Levels of Disaggregation:	
See Measurement No. 43 <ul style="list-style-type: none"> • No Dispatch • Dispatch 	
Calculation:	Report Structure:
$\Sigma[(\text{Date and time trouble report is cleared with the customer}) - (\text{date and time trouble report is received})] \div \text{total network customer trouble reports}$	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
Parity with SWBT Retail.	

53. Measurement	
Percent Repeat Reports	
Definition:	
Percentage of customer trouble reports received within 30 calendar days of a previous customer report.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunk • Excludes trouble tickets that are coded to Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational 	
Business Rules:	
Includes customer trouble reports received within 30 calendar days of an original customer report. When the second report is received in 30 days, the original report is marked as an Original of a Repeat, and the second report is marked as a Repeat. If a third report is received within 30 days, the second report is marked as an Original of a Repeat as well as being a Repeat, and the third report is marked as a Repeat. In this case there would be two repeat reports.	
Levels of Disaggregation:	
See Measurement No. 43	
Calculation:	Report Structure:
(Count of customer trouble reports received within 30 calendar days of a previous customer report ÷ total network customer trouble reports) * 100	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
Parity with SWBT Retail.	

54. Measurement	
Trouble Report Rate	
Definition:	
The number of customer trouble reports within a calendar month per 100 circuits.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunks • Excludes trouble reports coded to Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational 	
Business Rules:	
CLEC and SWBT repair reports are entered into and tracked via WFA. Reports are counted in the month they post.	
Levels of Disaggregation:	
See Measurement No. 43	
Calculation:	Report Structure:
[Count of trouble reports ÷ (Total circuits ÷ 100)]	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
Parity with SWBT Retail.	

54.1. Measurement (New Measurement)	
Trouble Report Rate net of Installation and repeat Reports	
Definition:	
The number of customer trouble reports exclusive of installation and repeat reports within a calendar month per 100 circuits.	
Exclusions:	
<ul style="list-style-type: none"> • UNE and Interconnection Trunks • Excludes trouble reports coded to Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational • Excludes Trouble Reports included in PM 46. • Excludes Customer Trouble Reports included in PM 53. 	
Business Rules:	
CLEC and SWBT repair reports are entered into and tracked via WFA. Reports are counted in the month they post.	
Levels of Disaggregation:	
See Measurement No. 43	
Calculation:	Report Structure:
[Count of trouble reports exclusive of installation and repeat reports ÷ (Total circuits ÷ 100)]	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
Parity with SWBT Retail.	

IV. UNBUNDLED NETWORK ELEMENTS (UNES)

A. Provisioning

55. Measurement	
Average Installation Interval	
Definition:	
Average business days from application date to completion date for N, T, and C orders excluding customer caused misses and customer requested due date greater than “X” business days. The “X” business days is determined based on quantity of UNE loops ordered and the associated standard interval.	
Exclusions:	
<ul style="list-style-type: none"> • Specials and Interconnection Trunks. • Excludes UNE Combos captured in the POTS or Specials measurements. • Exclude orders that are not N, T, or C. • Excludes customer requested due dates greater than “X” business days as set out in benchmark measures below. • Excludes customer caused misses. • Excludes Weekends and Holidays. • Excludes circuits in PM 55.2 • Excludes expedites for which the CLEC pays an expedite charge. • Excludes xDSL loops in PM 55.1. • <u>Excludes any incremental days attributable to the CLEC after the initial SWBT caused delay. Does not exclude No Access attributable to the end user after the initial due date has been missed by SWBT.</u> 	
Business Rules:	
The Application Date is the day that the customer initiated the service request. The Completion Date is the day that SWBT personnel complete the service order activity. The base of items is out of WFA (Work Force Administration) and it is reported at a an order level.	
Levels of Disaggregation:	
UNEs contained in the UNE price schedule, and/or agreed to by parties.	
Calculation:	Report Structure:
$[\sum(\text{completion date} - \text{application date})] \div (\text{Total number of orders completed})$	Reported for CLEC and all CLECs
Measurement Type:	
Benchmark Tier 1 – None Tier 2 – None	

Benchmark:

The standard offered interval is defined in business days as follows:

- Switch Ports – Analog Port – 3 Days
- Switch Ports – BRI Port (1-50) – 3 Days
- Switch Ports – BRI Port (50+) – 5 Days
- Switch Ports – PRI Port (1-20) – 5 Days
- Switch Ports – PRI Port (20+) – 10 Days
- DS1 Trunk Port (1 to 10) – 3 Days
- DS1 Trunk Port (11 to 20) – 5 Days
- DS1 Trunk Port (20+) – ICB
- Dark Fiber (1 to 10) – 5 Days
- Dark Fiber (11 to 20) – 7 Days
- Dark Fiber (20+) – 10 Days
- Dedicated Transport (DS0, DS1, and DS3) (1 to 10) – 3 Days
- Dedicated Transport (DS0, DS1, and DS3) (11 to 20) – 5 Days
- Dedicated Transport (DS0, DS1, and DS3) (20+) and all other types – Negotiate
- BRI Loop (1 to 10) - 4Days
- BRI Loop (11 to 20)– 10 Days
- BRI Loop (20+) – Negotiate
- 8.0 dB Loops (1 to 10) – 3
- 8.0 dB Loops (11 to 20) – 7
- 8.0 dB Loops (20+) – 10
- 5.0 dB Loops (1 to 10) – 3
- 5.0 dB Loops (11 to 20) – 7
- 5.0 dB Loops (20+) – 10
- INP (1-10 Numbers) – 3 days
- INP (11-20 Numbers) – 7 days
- INP (> 20 Numbers) – 10 days

55.1 Measurement**Average Installation Interval – DSL****Definition:**

Average business days from application date to completion date for N, T, and C orders excluding customer caused misses and customer requested due date greater than the offered interval.

Exclusions:

- Exclude orders that are not N, T, or C.
- Excludes customer requested due dates greater than the standard offered interval
- Excludes customer caused misses.
- Excludes Weekends and Holidays.
- Excludes expedites (less than 3 days).
- Excludes Rejects for non-conformance as to PSD masks if, and only if, the CLEC requests such qualification on the LSR
- Excludes any incremental days attributable to the CLEC after the initial SWBT caused delay. Does not exclude No Access attributable to the end user after the initial due date has been missed by SWBT.

Business Rules:

The Application Date is the day that the customer authorizes SWBT to provision the DSL based on the loop qualification. If the CLEC uses the “one-step” process (combined loop qualification request and LSR), and the loop qualification determines that the existing loop, in its current condition, meets the CLEC’s specifications, SWBT will initiate the service order when the loop qualification is returned from SWBT engineering and this date will be the application date. If the loop in its current condition does not meet the CLEC’s specifications, SWBT will reject the LSR back to the CLEC and wait for a supplement from the CLEC notifying SWBT of the appropriate action to take. If the CLEC supplements the LSR to order the DSL, SWBT will issue the order and the application date will be the date that SWBT receives the supplement. If the CLEC uses the “two-step” process (loop qualification performed on a pre-order basis) or waives the loop qualification for a loop that pre-qualifies as “green,” SWBT will issue the order upon receipt of a valid LSR and the Application Date will be the date that SWBT receives the valid LSR. The Completion Date is the day that SWBT personnel complete the service order activity. If the CLEC has requested that Cooperative Acceptance Testing be performed on the loop, the Completion Date is the day that successful Cooperative Acceptance Testing is completed. This is reported at a circuit level.

NOTE: For all of the above scenarios, the CLEC’s specifications for the loop will be considered met under the following circumstances:

- If the CLEC has specified “AS IS” on the initial LSR, the loop meets the CLEC’s specifications if the loop qualification does not show that the end user’s address is served exclusively by Digital Loop Carrier (“DLC”).
- If the CLEC has pre-authorized conditioning on the initial LSR, the loop meets the CLEC’s specifications if the loop qualification does not show that the end

user's address is served exclusively by DLC. Any load coils, repeaters and/or bridged/end tap greater than or equal to 2.5 kft, revealed on the loop qualification will be removed per the requirements of the SPEC code. If the CLEC pre-authorizes conditioning, CLEC will not have to provide an additional LSR requesting provision of the loop.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • Loops requiring no conditioning with Line Sharing • Loops requiring conditioning with Line Sharing • Loops requiring no conditioning with no Line-Sharing • Loops requiring conditioning with no Line-Sharing • Broadband service product (Note: Additional disaggregations may be required as necessary in the future. 	
Calculation:	Report Structure:
$[\sum(\text{completion date} - \text{application date})] \div (\text{Total number of circuits completed})$	Reported for CLEC and all CLECs, SWBT or affiliate.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
<ul style="list-style-type: none"> • Non-Conditioned Loops with no line sharing– 5 Business Days. Critical z-value applies. • Conditioned Loops with no line sharing – 10 Business Days. Critical z-value applies. • Loops with line sharing – Parity 	

55.2 Measurement
Average Installation Interval for Loop With LNP
Definition:
Average business days from the receipt of an accurate LSR to completion date for N, T, and C orders excluding customer caused misses and customer requested due date greater than “X” business days. The “X” business days is determined based on quantity of UNE loops ordered and the associated standard interval.
Exclusions:
<ul style="list-style-type: none"> • Specials and Interconnection Trunks. • Excludes UNE Combinations captured in the POTS or Specials measurements. • Excludes orders that are not N, T, or C. • Excludes customer requested due dates greater than “X” business days. X is defined as follows: <ul style="list-style-type: none"> Loop with LNP (1-10) – 4 business days Loop with LNP (11-20) – 8 business days Loop with LNP (>20) – 11 business days • Excludes customer caused misses. • Excludes Weekends and Holidays. • NPAC caused delays unless caused by SWBT.
Business Rules:
<p>The start time is the date of the receipt of an accurate LSR. The Completion Date is the day that SWBT personnel complete the service order activity. If the CLEC submits the LSR prior to 3:00 p.m. the CLEC may request a 3 day interval. If the LSR is submitted after 3:00 p.m. the CLEC can request a 4 day interval. The base of items is out of WFA (Work Force Administration) and it is reported at an order level to account for different measurement standards based on the number of circuits per order.</p> <p>For partial LNP conversions that require restructuring of customer account:</p> <ul style="list-style-type: none"> • 1-30 TNs: Add one additional day to the FOC interval. The LNP due date intervals will continue to be three business days and five business days from the receipt of the FOC depending on whether the NXX has been previously opened or is new. • >30 TNs, including entire NXX: The due dates are negotiated.
Levels of Disaggregation:
<ul style="list-style-type: none"> • CHC <ul style="list-style-type: none"> Loop with LNP (1-10) Loop with LNP (11-20) Loop with LNP (>20) • FDT <ul style="list-style-type: none"> Loop with LNP (1-10) Loop with LNP (11-20) Loop with LNP (>20)

Calculation:	Report Structure:

55.3 Measurement	
Percent xDSL-capable loop orders requiring the removal of load coils and or repeaters.	
Definition:	
The percentage of all xDSL-capable loops, greater than 12,000 feet (based on designed loop makeup information), ordered that require the removal of load coils or repeaters to provision xDSL services.	
Exclusions:	
Loops under 12,000 feet	
Business Rules:	
The percentage of all orders for xDSL-capable loops where the removal of load coils or repeaters has been requested by the CLEC.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> Loops between 12,000 feet and 17,500 feet Loops over 17,500 feet 	
Calculation:	Report Structure:
$\frac{[\sum(\text{number of xDSL-capable loops requesting the removal of load coils or repeaters})]}{(\text{Total number of orders for xDSL-capable loops UNEs completed})}$	Reported for CLEC, SWBT DSL Affiliate, and all CLECs.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
Diagnostic only.	

55.4. Measurement (New Measure)	
Percent Provisioning Trouble Reports (PTR) on Line Sharing Orders	
Definition:	
Measures the percent of DSL –capable circuits for which the CLEC submits a trouble report after 5pm on the day before the due date and that are not provisioned correctly on the due date.	
Exclusions:	
<ul style="list-style-type: none"> None 	
Business Rules:	
The percent of DSL-capable circuits for which the CLEC submits a trouble report after 5pm on the day before due date for a line sharing order and that are not provisioned correctly on the due date. Line sharing orders shall be included herein without regard to whether the order is for the establishment of new services or is a conversion from one provider to another.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> None 	
Calculation:	Report Structure:
(Count of line sharing orders for which the CLEC submits a trouble report after 5pm the day before the due date and that are not provisioned correctly on the due date divided by the total number of line sharing orders.)	Reported by CLEC, SWBT/affiliate and all CLECs.
Measurement Type:	
Diagnostic	
Benchmark:	
Parity with SWBT's Data Affiliate or SWBT retail.	

55.5 Measurement (New Measure)	
Loop Acceptance Testing (LAT Completed)	
Definition:	
Percent Loop Acceptance Test completed on or before due date.	
Exclusions:	
Orders where LAT not requested	
Business Rules:	
Loop Acceptance Test is where a SWBT Technician (Frame/Field as appropriate) is requested via an LSR to complete a Loop Acceptance Test. Loop Acceptance Test is completed on or before due date. The SWBT Technician will contact the CLEC via the LOC. The Tech will complete a series of tests with the CLEC to ensure a good loop is delivered (ie;connectivity, meets xDSL parameters).	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • IDSL Loops • DSL Loops with Line Sharing (placeholder until LAT for line sharing is broadly available) • DSL Loops without Line Sharing

56. Measurement	
Percent (UNEs) Installations Completed Within The Customer Requested Due Date	
Definition:	
Measure of orders completed within the customer requested due date when that date is greater than or equal to the standard offered interval as defined in the CLEC manual or if expedited (accepted or not accepted), the date agreed to by SWBT.	
Exclusions:	
<ul style="list-style-type: none"> • Specials and Interconnection Trunks. • Excludes UNE Combos captured in the POTS or Specials measurements. • Exclude orders that are not N, T, or C. • Excludes customer caused misses. • Excludes Weekends and Holidays • Excludes orders captured in PM 56.1 (LNP With Loop) 	
Business Rules:	
The Application Date is the day that the customer initiated the service request. The Completion Date is the day that SWBT personnel complete the service order activity by circuit. For orders requiring negotiated due dates, the negotiated due date will be considered the customer requested due date. This measure includes expedites agreed to by SWBT. This measure is reported at a circuit level.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • UNEs contained in the UNE price schedule, and/or agreed to by parties. • DSL loops with line Sharing • DSL loops with no line sharing • Broadband service product (Note: Additional disaggregations may be required as necessary in the future. 	
Calculation:	Report Structure:
Count of orders installed within the customer requested due date ÷ total orders) * 100	Reported for CLEC , all CLECs, and SWBT for parity measures affiliate as appropriate.
Measurement Type:	
Tier 1 – None	
Tier 2 – None	

Benchmark:

95% within the customer requested due date. The following standard offered intervals apply:

- 2 Wire Analog and Digital and INP (1-10) – 3 Days
- 2 Wire Analog and Digital and INP (11-20) – 7 Days
- 2 Wire Analog and Digital and INP (20+) – 10 Days
- BRI Loops (1-10) – 4 Days
- BRI Loops (11-20) – 10 Days
- BRI Loops (20+) – Negotiate
- DS1 loop(includes PRI) (1-10) – 3 Days
- DS1 loop(includes PRI) (11-20) – 7 Days
- DS1 loop(includes PRI) (20+) – 10 Days
- Switch Ports – Analog Port – 2 Days
- Switch Ports – BRI Port (1-50) – 3 Days
- Switch Ports – BRI Port (50+) – 5 Days
- Switch Ports – PRI Port (1-20) – 5 Days
- Switch Ports – PRI Port (20+) – 10 Days
- DS1 Trunk Port (1 to 10) – 3 Days
- DS1 Trunk Port (11 to 20) – 5 Days
- DS1 Trunk Port (20+) – ICB
- Dedicated Transport (DS0, DS1, and DS3) (1 to 10) – 3 Days
- Dedicated Transport (DS0, DS1, and DS3) (11 to 20) – 5 Days
- Dedicated Transport (DS0, DS1, and DS3) (20+) and all other types – ICB
- DSL with no Line Sharing – Non Conditioned – 5 Days
- DSL with no Line Sharing – Conditioned – 10 Days

Parity with ASI

- DSL with Line Sharing

90% within the customer requested due date. The following standard offered intervals apply:

- INP (1-10 Numbers) – 3 days
- INP (11-20 Numbers) – 7 days
- INP (> 20 Numbers) – 10 days

56.1 Measurement	
Percent Installations Completed within the Customer Requested Due Date for LNP With Loop	
Definition:	
Percent installations completed within the customer requested due date when that date is greater than or equal to the standard offered interval as defined in the CLEC manual or if expedited (accepted or not accepted), the date agreed to by SWBT	
Exclusions:	
<ul style="list-style-type: none"> • Specials and Interconnection Trunks. • Excludes UNE Combinations captured in the POTS or Specials measurements. • Exclude orders that are not N, T, or C. • Excludes customer caused misses. • NPAC caused delays unless caused by SWBT.

59. Measurement
Percent Installation Reports (Trouble Reports) Within “X” calendar days, where “X” is 10 calendar days for 8db loops and 30 calendar days for all other UNEs(I-10/30) of Installation
Definition:
Percentage of UNEs that receive a customer trouble report within X” calendar days, where “x” is 10 calendar days for 8db loops and 30 calendar days for all other UNEs, of service order completion.
Exclusions:
<ul style="list-style-type: none"> • Specials and Interconnection Trunks. • Excludes UNE Combos captured in the POTS or Specials measurements. • Excludes trouble report received on the due date before service order completion. • Excludes trouble tickets that are coded to Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational • Excludes loops without test access - BRI • Excludes orders that are not N, T, or C. • Excludes DSL loops > 12Kf with load coils, repeaters, and/or excessive bridged tap for which the CLEC has not authorized conditioning unless coded to the Central Office. • Excludes PTRs as defined in PM 115 • Excludes trouble reports caused by lack of digital test capabilities on 2-wire BRI and IDSL capable loops where acceptance testing is available and not selected by the CLEC. • Excludes trouble reports for DSL stand alone loops caused by the lack of loop acceptance testing between CLEC and SWBT due to CLEC reasons on the due date.
Business Rules:
A trouble report is counted if it is received within “X” calendar days, where “X” is 10 calendar days for 8db loops and 30 calendar days for all other UNEs, calendar days of a service order completion. UNEs are selected based on a specific service code off of the circuit ID. This measurement is reported at a circuit level. The denominator for this measure is the total count of circuits posted within the reporting month. (However, the denominator will at a minimum equal the numerator). The numerator is the number of trouble reports received within “X” calendar days where “X” is 10 calendar days for 8db loops and 30 calendar days for all other UNEs, calendar days of service order completion that were closed during the reporting month.
Levels of Disaggregation:

<ul style="list-style-type: none"> • UNEs contained in the UNE price schedule, and/or agreed to by parties. • DSL loops with line Sharing • DSL loops with no line sharing • Broadband service product (Note: Additional disaggregations may be required as necessary in the future. 	
Calculation:	Report Structure:
(Count of UNEs that receive a customer trouble report within “X” calendar days where “X” is 10 calendar days for 8db and 30 calendar days for all other UNEs, of service order completion ÷ total UNEs) * 100	Reported for CLEC, all CLECs, SWBT or its affiliates.
Measurement Type:

62. Measurement	
Average Delay Days For SWBT Caused Missed Due Dates	
Definition:	
Average calendar days from the customer requested due date when that date is greater than or equal to the offered interval, or if expedited (accepted or not accepted), the date agreed to by SWBT which is the due date reflected on the FOC, to completion date on company missed UNEs (8.0 dB loops are measured at an order level).	
Exclusions:	
<ul style="list-style-type: none"> • Specials and Interconnection Trunks. • Excludes UNE Combos captured in the POTS or Specials measurements. • Excludes orders that are not N, T, or C. • <u>Excludes any incremental days attributable to the CLEC after the initial SWBT caused delay. Does not exclude No Access attributable to the end user after the initial due date has been missed by SWBT.</u> 	
Business Rules:	
The calculation is the difference in calendar days between the completion date and the FOC due date. The Due Date is the customer requested due date when that date is greater than or equal to the offered interval. If expedited (accepted or not accepted), the Due Date is the date agreed to by SWBT, which is the due date reflected on the FOC. The data is reported at a circuit level. UNEs are selected based on a specific service code off of the circuit ID. This measurement is reported at a circuit level for all UNEs with the exception of 8.0 dB loops, which are reported at an order level to facilitate comparison with POTS retail.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • UNEs contained in the UNE price schedule, and/or agreed to by parties. • DSL loops with line Sharing • DSL loops with no line sharing • Broadband service product (Note : Additional disaggregations may be required as necessary in the future) 	
Calculation:	Report Structure:
$\Sigma(\text{Completion date} - \text{committed UNE (8.0 dB loops are measured at the order level) due date as described in the business rules above}) \div (\# \text{ of posted UNEs (total completed orders for 8.0 dB loops) with SWBT caused missed due dates})$	Reported for CLEC, all CLECs, SWBT or affiliates.

DSL Loops with no Line Sharing – 12.0% (Critical z-value does not apply)

Broadband service product (Note : Additional disaggregations may be required as necessary in the future)

V. INTERCONNECTION TRUNKS

70. Measurement:

Percentage of Trunk Blockage

Definition:

Percentage of calls blocked on outgoing traffic for alternate final (AF) and direct final (DF) trunk groups from SWBT end office to CLEC end office and from SWBT tandem to CLEC end office.

Exclusions:

- Excludes Weekends and Holidays
- CLECs have trunks busied-out for maintenance at their end, or have other network problems that are under their control.
- SWBT is ready for turn-up on Due Date and CLEC is not ready or not available for turn-up of trunks, e.g. not ready to accept traffic from SWBT on the due date or CLEC has no facilities or equipment at CLEC end.
- CLEC does not take action upon receipt of Trunk Group Service Request (TGSR) or ASR within 3 business days (day 0 is the business day the TGSR is emailed/faxed to the CLEC) when a Call Blocking situation is identified by SWBT or in the timeframe specified in the InterConnection Agreement (ICA).
- If CLEC does not take action upon receipt of TGSR within 10 business days (day 0 as described above) when a pre-service of 75% or greater occupancy situation is identified by SWBT or in the time frame specified in the ICA.
- If CLEC fails to provide a forecast within the last six months unless a different timeframe is specified in an interconnection agreement.
- For trunks extending from the SWBT tandem to the CLEC end office designated as final trunks, if CLEC's actual trunk usage for a market region, as shown by SWBT from traffic usage studies, is more than 25% above CLEC's most recent forecast for the market region, which must have been provided within the last six-months unless a different timeframe is specified in an interconnection agreement as long as the forecasts are received as described in the accessible letter are received.
- For trunks extending from the SWBT end office to the CLEC end office, if CLEC's actual trunk usage for a wirecenter or end office, as shown by SWBT from traffic usage studies, is more than 25% above CLEC's most recent forecast for the wirecenter or end office, which must have been provided within the last six-months unless a different timeframe is specified in an interconnection agreement as long as the forecasts are received as described in the accessible letter are received.

The exclusions do not apply if SWBT fails to timely provide CLEC with traffic utilization data reasonably required for CLEC to develop its forecast or if SWBT refuses to accept CLEC trunk orders (ASRs or TGSRs) that are within the CLEC's reasonable forecast regardless of what the current usage data is.

Business Rules:	
Twenty days of data consisting of blocked calls and total calls are collected and aggregated each month.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> The SWBT end office to CLEC end office and SWBT tandem to end office trunk blockage will be reported separately. By Market Region. 	
Calculation:	Report Structure:
$(\{\text{Count of blocked calls} - \text{excluded blocked calls}\} \div \text{total calls offered} - \{\text{excluded blocked calls}\}) * 100$	Reported for CLEC and all CLECs .
Measurement Type:	
Tier-1 High Tier-2 High	
Benchmark:	
Blocked Calls on Dedicated Trunk Groups not to exceed blocking standard of B.01. [B.01 standard is 1%]	

70.1 Measurement:	
Trunk Blockage Exclusions	
Definition:	
Number of calls blocked on outgoing traffic from SWBT end office to CLEC end office and from SWBT tandem to CLEC end office that are excluded from the trunk blockage data reported under PM 70.	
Exclusions:	
<ul style="list-style-type: none"> None 	
Business Rules	
Number of blocked calls and total calls excluded from the monthly blockage data reported under Performance Measurement 70. No penalties or liquidated damages apply. See PM 70 for list of the exclusions.

<ul style="list-style-type: none"> By Market Region. 	
Calculation:	Report Structure:
Count of Excluded blocked calls	Reported for CLEC and all CLECs .
Measurement Type:	
None	
Benchmark:	
Diagnostic	

71. Measurement:	
Common Transport Trunk Blockage	
Definition:	
Percentage of local common transport trunk groups exceeding 2%, 1% blockage.	
Exclusions:	
<ul style="list-style-type: none"> No data is collected on weekends or holidays 	
Business Rules:	
Common transport trunk groups that reflect blocking in excess of 2% and 1% (if a separate common transport trunk group is established to carry CLEC traffic only) using a time consistent busy hour from the four most recent weeks of data.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> Common trunk groups where CLECs share ILEC trunks, and Common trunk groups for CLECs not shared by ILEC. By Market Region. 	
Calculation:	Report Structure:
(Number of common transport trunk groups exceeding 2%, 1% blocking ÷ total common transport trunk groups) * 100.	Reported on local common transport trunk groups.
Measurement Type:	
Tier-1 None Tier-2 High	
Benchmark:	
3% of trunk groups not to exceed 2% blockingSWBT shall compare common trunk groups exceeding 1% blockage, reported for switch based CLECs, be compared to SWBT's dedicated trunk groups designed for B.01 standard for parity compliance <u>(if a separate common transport trunk group is established to carry CLEC traffic only).</u>	

PM 72 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

73. Measurement	
Percentage of Installations Completed Within the Customer Requested Due Date	
Definition:	
Percentage of interconnection trunks completed within the customer requested due date, where the requested customer requested due date is greater than or equal to 20 days or if expedited (accepted or not accepted) the date agreed to by SWBT.	
Exclusions:	
<ul style="list-style-type: none"> • CLEC Caused Misses 	
Business Rules:	
SWBT will compare the completion date to the customer desired due date, where the requested customer requested due date is greater than or equal to 20 days or if expedited (accepted or not accepted) the date agreed to by SWBT to determine the count of missed installations. The completion date is the date the work is completed and accepted by the CLEC. The measurement is taken for all circuits that complete in the reporting period. Interconnection trunks are selected based on a specific service code off of the circuit ID. Unsolicited FOCs will not be acknowledged in calculating due dates. (i.e., if an unsolicited FOC is received by CLEC, the due date on the first FOC will still be used as the due date. Orders that are completed more than 30 days after the customer requested due date and reported as held orders under PM 73.1 also are included in reporting this measure.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • By Market Region. • 911 • OS/DA • SS7 • Interconnection trunks 	
Calculation:	Report Structure:
(Count trunk circuits completed within the customer requested due date, where the requested customer requested due date is greater than or equal to 20 days or if expedited (accepted or not accepted) the date agreed to by SWBT ÷ total trunk circuits completed) * 100	Reported for CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	

95% within the customer requested due date or agreed to expedited interval. Critical z-value does not apply.
--

73.1 Measurement	
Percentage Held Interconnection Trunks	
Definition:	
Percentage of interconnection trunk orders held greater than 30, 60 or 90 calendar days.	
Exclusions:	
<ul style="list-style-type: none"> • Customer Caused Misses • Excludes any incremental days attributable to the CLEC after the initial SWBT caused delay. 	
Business Rules:	
The Customer Desired Due Date or the 21 st business day after the interconnection trunk order is received by SWBT, whichever is greater, starts the clock. The Completion Date is the day that SWBT personnel complete the service order activity and it is accepted by the CLEC, which stops the clock. The data is collected at a circuit level. Interconnection trunks are selected based on a specific service code off of the circuit ID.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • By Market Region; 30, 60 and 90 days • Interconnection • 911 • OS/DA • SS7 	
Calculation:	Report Structure:
(Count of trunk circuits held for greater than 30, 60 or 90 calendar days ÷ total trunk circuits) * 100,	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – Medium Tier 2 – Low	
Benchmark:	
Parity with SWBT interconnection trunks. For purposes of damages, only applicable to trunk orders held greater than 30 days.	

74. Measurement	
Average Delay Days For Missed Due Dates – Interconnection Trunks	
Definition:	
Average calendar days from customer requested due date where the date is greater than or equal to 20 days or if expedited (accepted or not) the date agreed to by SWBT to completion date on company missed interconnection trunk orders.	
Exclusions:	
<ul style="list-style-type: none"> • Customer Caused Misses • Excludes any incremental days attributable to the CLEC after the initial SWBT caused delay. 	
Business Rules:	
The calculation is the difference in calendar days between the completion date (the date the CLEC accepts the circuit) and the customer requested due date where the date is greater than or equal to 20 days or if expedited (accepted or not) the date agreed to by SWBT. The data is reported at a circuit level. Interconnection Trunks are selected based on a specific service code off of the circuit ID.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • By Market Region • Interconnection • 911 • OS/DA • SS7. 	
Calculation:	Report Structure:
Σ (Completion date – customer requested due date where the date is greater than or equal to 20 days or if expedited (accepted or not) the date agreed to by SWBT) ÷ (# of completed trunk circuits with missed Due Dates)	Reported by CLEC, all CLECs and SWBT.

PM 82 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

VII. LOCAL NUMBER PORTABILITY (LNP)

91. Measurement:	
Percentage of LNP Only Due Dates within Industry Guidelines	
Definition:	
Percentage of LNP Due Date interval that meets the industry standard established by the North American Numbering Council (NANC).	
Exclusions:	
<ul style="list-style-type: none"> • CLEC or Customer caused or requested delays. • NPAC caused delays unless caused by SWBT. 	
Business Rules:	
<p>Industry guidelines for due dates for LNP are as follows:</p> <ul style="list-style-type: none"> • For Offices in which NXXs are previously opened – 3 Business Days. • New NXX – 5 Business days on LNP capable NXX. <p>The above-noted due dates are from the date of the FOC receipt.</p> <p>For partial LNP conversions that require restructuring of customer account:</p> <ul style="list-style-type: none"> • 1-30 TNs: Add one additional day to the FOC interval. The LNP due date intervals will continue to be three business days and five business days from the receipt of the FOC depending on whether the NXX has been previously opened or is new. • >30 TNs, including entire NXX: The due dates are negotiated. 	
Levels of Disaggregation:	
NXXs previously opened and NXX new (1-30 TNs and greater than 30 TNs)	
Calculation:	Report Structure:
(Count of LNP TNs implemented within Industry guidelines ÷ total number of LNP TNs) *100	Reported by CLEC and all CLECs.
Measurement Type:	
<p>Tier 1 – None</p> <p>Tier 2 – None</p>	
Benchmark:	
96.5%. The benchmark will be revised either up or down if industry guidelines are established that are different than the objective stated here. Critical z-value does not apply.	

92. Measurement:	
Percentage of Time the Old Service Provider Releases the Subscription Prior to the Expiration of the Second 9 Hour (T2) Timer	
Definition:	
Percentage of time the old service provider releases subscription(s) to NPAC within the first (T1) or the second (T2) 9-hour timers.	
Exclusions:	
<ul style="list-style-type: none"> • Customer caused or requested delays. • NPAC caused delays unless caused by SWBT. • Cases where SWBT did the release but the New Service Provider did not respond prior to the expiration of the T2 timer. This sequence of events causes the NPAC to send a cancel of SWBT's release request. In these cases, SWBT may have to re-work to release the TN so it can be ported to meet the due date. 	
Business Rules:	
Number of LNP TNs for which subscription to NPAC was released prior to the expiration of the second 9-hour (T2) timer.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(Number of LNP TNs for which subscription to NPAC was released prior to the expiration of the second 9-hour (T2) timer ÷ total number of LNP TNs for which the subscription was released) *100	Reported by CLEC and all CLECs.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
96.5%. The benchmark will be revised either up or down if industry guidelines are established that are different than the objective stated here. Critical z-value does not apply.	

93. Measurement:	
Percentage of Customer Account Restructured Prior to LNP Due Date	
Definition:	
Percentage of accounts restructured within the LNP order due date established in Measurement No. 91, and/or negotiated due date for orders that contain more than 30 TNs.	
Exclusions:	
None	
Business Rules:	
See Measurement No. 91	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(Number of LNP orders for which customer accounts were restructured prior to LNP due date) ÷ (total number of LNP orders that require customer accounts to be restructured) *100	Reported by CLEC and all CLECs.
Measurement Type	
Tier 1 – Low Tier 2 – None	
Benchmark:	
96.5% Critical z-value applies.	

96. Measurement:	
Percentage Pre-mature Disconnects for CHC/FDT Stand alone LNP Telephone Numbers	
Definition:	
Percentage of Stand Alone LNP telephone numbers where SWBT disconnects the customer prior to the scheduled start time.	
Exclusions:	
<ul style="list-style-type: none"> Stand alone LNP telephone numbers where the CLEC requests that the cut-over begin prior to the scheduled time. Change of the Due Date by the CLEC less than four business hours prior to the scheduled Date/Time Stand alone LNP telephone numbers where SWBT disconnects ≤ 10 minutes of the scheduled start time 	
Business Rules:	
A premature disconnect occurs any time SWBT begins the cut-over more that 10 minutes prior to the scheduled start time.	
Levels of Disaggregation:	
None.	
Calculation:	Report Structure:
Count of prematurely disconnected Stand Alone LNP telephone numbers \div total Stand Alone LNP telephone numbers * 100	Reported by CLEC and all CLECs
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
$\leq 2\%$ premature disconnects. Critical z-value applies.	

97. Measurement:	
Percentage of Time SWBT Applies the 10-digit Trigger Prior to the LNP Order Due Date	
Definition:	
Percentage of time SWBT applies 10-digit trigger, where technically feasible, for LNP or LNP with loop TNs prior to the due date.	
Exclusions:	
<ul style="list-style-type: none"> Excludes Remote Call Forwarding in DMS 100s, DID in all offices and ISDN Data TNs.” Excludes CLEC or Customer caused misses or delays 	
Business Rules:	
Obtain number of LNP or LNP with loop TNs where the 10-digit trigger was applied on the day prior to due date, and the total number of LNP or LNP with Loop TNs where the 10-digit trigger was applied, where technically feasible.	
Levels of Disaggregation:	
LNP only, and LNP with Loop.	
Calculation:	Report Structure:
(Count of LNP TNs for which 10-digit trigger was applied prior to due date ÷ total LNP TNs for which 10-digit triggers were applied) * 100.	Reported by CLEC and all CLECs.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
96.5% Critical z-value applies.	

98. Measurement:	
Percentage Stand Alone LNP I-Reports in 10 Days	
Definition:	
Percentage of Stand Alone LNP Orders that receive a LNP related customer trouble report within 10 calendar days of service order completion.	
Exclusions:	
<ul style="list-style-type: none"> Excludes Customer Premise Equipment, Interexchange Carrier/Competitive Access Provider, and Informational 	
Business Rules:	
The Start time is the date/time of completion of the service order. The End time is the date/time of receipt of trouble report. Count the number of Stand Alone LNP Orders that receive an LNP related trouble report within 10 calendar days of completion.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> Stand Alone LNP 	
Calculation:	Report Structure:
(Count of Stand Alone LNP Orders that receive a customer trouble report within 10 calendar days of service order completion ÷ total Stand Alone LNP orders) * 100.	Reported by CLEC and all CLECs, and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
Parity with SWBT Retail POTS – No Field Work.	

99. Measurement:	
Average Delay Days for SWBT Missed Due Dates for Stand Alone LNP Orders	
Definition:	
Average calendar days from due date to completion date on company missed orders.	
Exclusions:	
<ul style="list-style-type: none"> On time or early completions 	
Business Rules:	
The clock starts on the due date and the clock ends on the completion date based on posted Stand Alone LNP orders.	
Levels of Disaggregation:	
LNP Only	
Calculation:	Report Structure:
$\frac{\Sigma(\text{Stand Alone LNP Completion Date} - \text{Stand Alone LNP Order due date})}{\# \text{ total Stand Alone LNP Orders where there was a SWBT caused missed due date}} * 100$	Reported By CLEC and all CLECs and SWBT.
Measurement Type:	
Tier 1 – Medium Tier 2 – Medium	
Benchmark:	
Parity with SWBT Retail POTS – No Field Work.	

PM 100 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

101. Measurement:	
Percent Out of Service < 60 minutes	
Definition:	
The Number of LNP related conversions where the time required to facilitate the activation of the port in SWBT's network is less than 60, expressed as a percentage of total number of activations that took place.	
Exclusions:	
<ul style="list-style-type: none"> • CLEC-caused errors. • NPAC-caused errors unless caused by SWBT. • Stand Alone LNP Orders with more than 500 number activations. 	
Business Rules:	
The Start time is the receipt of the NPAC broadcast activation message in SWBT's LSMS. The End time is when the Provisioning event is successfully completed in SWBT's network as reflected in SWBT's LSMS. Count the number of activations that took place in less than 60 minutes.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • None 	
Calculation:	Report Structure:
(Number of activations provisioned in less than 60minutes) ÷ (total LNP activations)* 100.	Reported by CLEC and all CLECs.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
96.5% Critical z-value does not apply.	

VIII. 911

102. Measurement	
Average Time To Clear Errors	
Definition:	
The average time it takes to clear an error after it is detected during the processing of the 911 database file. This is only on resale or UNE loop and port combination orders that SWBT installs.	
Exclusions:	
None	
Business Rules:	
The clock starts upon the receipt of the error file and the clock stops when the error is corrected.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
$\Sigma(\text{Date and time error detected} - \text{date and time error cleared}) \div \text{total number of errors}$	Reported for CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
Parity	

103. Measurement	
Percent Accuracy for 911 Database Updates (Facility Based Providers)	
Definition:	
The percentage of 911 records that were updated by SWBT in error.	
Exclusions:	
CLEC caused errors.	
Business Rules:	
The data required to calculate this measurement will be provided by the CLEC based on the compare file. The CLEC will provide the number of records transmitted and the errors found. SWBT will verify the records determined to be in error to validate that the records were input by SWBT incorrectly. An update is completed without error if the database completely and accurately reflects the activity specified on the order submitted by the CLEC.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(Number of SWBT caused update errors ÷ Total number of updates) * 100	CLEC, All CLECs and SWBT.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
Parity	

104. Measurement	
Average Time Required to Update 911 Database (Facility Based Providers)	
Definition:	
The average time it takes to update the 911 database file.	
Exclusions:	
None	
Business Rules:	
The clock starts on the date/time when the data processing starts and the clock stops on the date/time when the data processing is complete.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
$\Sigma(\text{Date and time data processing begins} - \text{date and time data processing ends}) \div \text{total number of files}$	Reported for individual CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
Parity	

104.1 Measurement	
The average time it takes to unlock the 911 record	
Definition:	
The average time it takes to unlock the 911 record to allow the record to be claimed by the CLEC.	
Exclusions:	
None	
Business Rules:	
The clock starts on the date of completion and the clock stops on the date/time when the 911 record is unlocked.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
Sum (SOC Date - date 911 record is unlocked)	Reported for individual CLEC, and all CLECs and SWBT affiliates
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
Diagnostic	

IX. POLES, CONDUIT AND RIGHTS OF WAY

105. Measurement	
Percentage of requests processed within 35 Days	
Definition:	
The percentage of requests for access to poles, conduits, and right-of-ways processed within 35 days.	
Exclusions:	
None	
Business Rules:	
The clock starts upon the receipt date of the application for access to poles, conduits and right-of-ways and the clock stops upon response date of the application granting or denying access to poles, conduits and right-of-ways.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(count of number of requests processed within 35 days ÷ total number of requests) * 100	Reported for individual CLEC and all CLECs, and SWB DSL affiliate.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
90% within 35 days. Critical z-value does not apply.	

PM 106 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

X. COLLOCATION

107. Measurement	
Percentage Missed Collocation Due Dates	
Definition:	
The percentage of SWBT caused missed due dates for collocation projects.	
Exclusions:	
None	
Business Rules:	
<p>The clock starts when SWBT receives, in compliance with the approved tariff, payment and return of proposed layout for space as specified in the application form from the CLEC and the clock stops when the CLEC receives notice in writing or other method agreed to by the parties that the collocation arrangement is complete and ready for CLEC occupancy. The CLEC will then have 5 business days to accept or not accept the collocation space. If the CLEC does not accept the collocation space because the space is not complete and ready for occupancy as specified, and notifies SWBT of such within 5 business days, the collocation will be considered not complete and the time frame required for the CLEC to reject the collocation space (up to 5 business days) and any additional time required for SWBT to complete the space per the specifications will be counted as part of the interval. Any time exceeding the 5 business days will not be counted as part of the interval. Due Date Extensions will be extended when mutually agreed to by SWBT and the CLEC, or when a CLEC fails to complete work items for which they are responsible in the allotted time frame. The extended due date will be calculated by adding to the original due date the number of calendar days that the CLEC was late in performing said work items. Work items include but are not limited to:</p> <ul style="list-style-type: none"> • CLEC return to SWBT corrected and complete floor plan drawings. • CLEC placement of required component(s). <p>If the business rules and tariff are inconsistent, the terms of the tariff will apply.</p>	
Levels of Disaggregation:	
<p>Physical</p> <ul style="list-style-type: none"> • Caged • Shared Caged • Caged Common • Cageless • Adjacent On-site • Adjacent Off-site • Augments to Physical Collocation • Virtual • Augments to Virtual. 	
Calculation:	Report Structure:

(count of number of SWBT caused missed due dates for collocation facilities ÷ total number of collocation projects) * 100	Reported for individual CLEC and all CLECs and SWB affiliate
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
95% within the due date. Damages and Assessments will be calculated based on the number of days late. Critical z-value does not apply.	

108. Measurement	
Average Delay Days for SWBT Missed Due Dates	
Definition:	
The average delay days caused by SWBT to complete collocation facilities.	
Exclusions:	
None	
Business Rules:	
See Measurement No. 107	
Levels of Disaggregation:	
Physical, <ul style="list-style-type: none"> • Caged • Shared Caged • Caged Common • Cageless • Adjacent On-site • Adjacent Off-site • Augments to Physical Collocation Virtual • Augments to Virtual. 	
Calculation:	Report Structure:
$\Sigma(\text{Date collocation work completed} - \text{collocation due date}) \div \text{total number of SWBT caused missed collocation projects}$	Reported for individual CLEC and all CLECs and SWB affiliate as appropriate.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
10% of the tariffed intervals. The average delay days is compared to the weighted average of the different tariffed intervals within the levels of disaggregation. Critical z-value does not apply.	

109. Measurement	
Percent of Requests Processed Within the Tariffed Timelines	
Definition:	
The percent of requests for collocation facilities processed within the Tariffed timelines, or no space available notification.	
Exclusions:	
Excludes Weekends & Holidays.	
Business Rules:	
The clock starts when SWBT (ICSC) receives the application. The clock stops when SWBT responds back to the application request with a quote, or no space available notification.	
Levels of Disaggregation:	
Physical, <ul style="list-style-type: none"> • Caged • Shared Caged • Caged Common • Cageless • Adjacent On-site • Adjacent Off-site • Augments to Physical Collocation • Virtual • Augments to Virtual. 	
Calculation:	Report Structure:
(count of number of requests processed within the tariff timeline ÷ total number of requests) * 100	Reported for individual CLEC and all CLECs, or SWB affiliate as appropriate.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
90% within the tariff timeline. Critical z-value does not apply.	

XI. DIRECTORY ASSISTANCE DATABASE

110. Measurement	
Percentage of Updates Completed into the DA Database within 72 Hours for Facility Based CLECs	
Definition:	
The percentage of DA database updates completed within 72 hours of receipt of the update from the CLEC for directory change only and within 72 hours of the completion date on the provisioning service order where a provisioning order is required.	
Exclusions:	
Excludes Weekends and Holidays.	
Business Rules:	
The date and time stamp on fax updates starts the clock and the date and time when the listing is updated stops the clock. For directory changes that also have a provisioning order, the clock starts when the provisioning order completes and ends when the listing is updated. The update clerks work hours are 6:30 a.m. to 3:00 p.m. Monday through Friday. On requests received after 3:00 p.m. the clock will start at 6:30 a.m. the following day.	
Levels of Disaggregation:	
95% within 72 hours 95% within (X) hours (Diagnostic) 90% within (X) hours (Diagnostic)	
Calculation:	Report Structure:
(Count of updates completed within 72 hours ÷ total updates) * 100	Reported by CLEC and all CLECs for facility based providers.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
95% updated within 72 hours. Critical z-value does not apply. Diagnostic – 95% within (X) Hours Diagnostic – 90% within (X) Hours	

PM 111 WAS ELIMINATED WITH THE 6 MONTH REVIEW – EFFECTIVE 7/1/01

112. Measurement	
Percentage DA Database Accuracy For Manual Updates	
Definition:	
The percentage of DA records that were updated by SWBT in error. The data required to calculate this measurement will be provided by the CLEC. The CLEC will provide the number of records transmitted and the errors found. SWBT will verify the records determined to be in error to validate that the records were input by SWBT incorrectly.	
Exclusions:	
None	
Business Rules:	
See Measurement No. 110	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(Number of SWBT caused update errors ÷ Total number of updates) *100	Reported by CLEC and all CLECs for facility based providers.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
97% Critical z-value does not apply.	

113. Measurement	
Percentage of Electronic Updates that Flow Through the DSR process Without Manual Intervention	
Definition:	
Percentage of DSRs from entry to distribution that progress through SWBT ordering systems to ALPS/LIRA.	
Exclusions:	
Rejected DSRs due to CLEC error.	
Business Rules:	
The number of DSRs, that flow through SWBT's ordering systems and are passed to ALPS/LIRA without manual intervention, divided by the total number of DSRs issued within the reporting period.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(Number of DSRs that flow through to ALPS/LIRA ÷ Total DSRs) * 100	CLEC and All CLECs.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
97% Critical z-value applies.	

XII. COORDINATED CONVERSIONS

114. Measurement	
Percentage of Premature Disconnects for CHC/FDT LNP with Loop Lines.	
Definition:	
Percentage of CHC/FDT LNP with Loop Lines where SWBT disconnects the customer (e.g. switch translations and/or the cross connect is removed) prior to the scheduled start time.	
Exclusions:	
<ul style="list-style-type: none"> • CHC/FDT LNP with Loop Lines where the CLEC requests that the cut-over begin prior to the scheduled time. • Change of the Due Date by the CLEC less than four business hours prior to the scheduled Date/Time 	
Business Rules:	
A premature disconnect occurs any time SWBT begins the cut-over more than 10 minutes prior to the scheduled start time.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • Coordinated Hot Cuts (CHC) – LNP with Loop • Frame Due Time (FDT) – LNP with Loop 	
Calculation:	Report Structure:
(Count of prematurely disconnected CHC/FDT LNP with Loop Lines ÷ total CHC/FDT LNP with Loop Lines) * 100	Reported by CLEC and all CLECs.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
.See PM 115.2	

114.1 Measurement
CHC/FDT LNP with Loop Provisioning Interval.
Definition:
The % of CHC/FDT LNP with Loop Lines completed by SWBT within the established provisioning intervalsof <u>60 minutes (1 – 10 lines) and 120 minutes (11 – 24 lines).</u>
Exclusions:
<ul style="list-style-type: none"> • CHC/FDT LNP with Loop with greater than 24 loops (including multiple LSRs totaling 25 or more lines to the same customer premise on the due date). • CLEC caused delays (e.g., no dial tone from CLEC: CLEC translations) that do not allow SWBT the opportunity to complete CHC/FDT LNP with Loop within the designated interval. • IDLC (pair gain systems) identified on or before the due date. <u>(Thirty calendar days after the filing of the IDLC Report as required in the Business Rule, the IDLC exclusion shall be considered deleted.)</u>
Business Rules:
<p>The start time is at the direction of the CLEC and based on a negotiated and scheduled time for coordinated hot cut orders (CHC) and on the frame due time for frame due time (FDT). For CHC orders, the clock starts when the CLEC calls the SWBT LOC to start the conversion, and ends when the SWBT technician completes the cross connect to the CLEC facilities and has called the CLEC to notify that the cut-over has been completed. For FDT orders, the clock starts at the frame due time and ends when the SWBT technician completes the cross connect to the CLEC facilities. This measurement only includes Coordinated Hot Cuts and Frame Due Time with 1-24 loops. A conversion with 25 or more lines (including multiple orders totaling 25 or more lines to the same customer premise on the same due date) is considered a project and is negotiated with the CLEC at the time of conversion.</p> <p><u>On or before June 30, 2001, SWBT and the CLECs shall file with the Commission a report regarding the collaborative efforts to define, test, and implement a process to handle conversions when IDLC situations occur (the IDLC Report);</u></p>
Levels of Disaggregation:
<p>CHC</p> <ul style="list-style-type: none"> • LNP with loop <ul style="list-style-type: none"> • 1-10 lines • 11-24 lines <p>FDT (Diagnostic)</p> <ul style="list-style-type: none"> • LNP with loop <ul style="list-style-type: none"> • 1-10 lines • 11-24 lines

Calculation:	Report Structure:
Total CHC/FDT LNP with Loop Lines within the designated interval ÷ total CHC/FDT LNP with Loop lines.	Reported by CLEC and all CLECs.
Measurement Type:	
Tier 1 – High Tier 2 – Medium	
Benchmark:	
95%, for CHC. FDT is diagnostic and is addressed in the combined measure 115.2	

114.2 Measurement (New Measure) Place Holder For Future Use	
CHC/FDT For DSL Loops and Line Sharing.	
Definition:	
Exclusions:	
Business Rules:	
Levels of Disaggregation:	
Calculation:	Report Structure:
Measurement Type:	
Benchmark:	

115. Measurement	
Percent Provisioning Trouble Reports (PTR)	
Definition:	
Measures the percent of CHC/FDT LNP with loop circuits for which the CLEC submits a trouble report on the day of conversion, or before noon on the next business day.	
Exclusions:	
<ul style="list-style-type: none"> • Reports for which the trouble is attributable to the SWBT network (unless SWBT had knowledge of the trouble prior to the due date • IDLC (pair gain systems) identified on or before the due date. (<u>Thirty calendar days after the filing of the IDLC Report as required in the Business Rule, the IDLC exclusion shall be considered deleted.</u>) • Excludes Non-Measured reports (CPE, Interexchange, and Informational) 	
Business Rules:	
<p>The percent of CHC/FDT circuits for which the CLEC submits a trouble report on the day of conversion, or before noon on the next business day.</p> <p>PMs 55.2, 56.1 and 58 will include the PTRs that extend past the original due date in the calculation as appropriate.</p> <p>PMs 59 and 69 will exclude PTRs from the calculation.</p> <p><u>On or before June 30, 2001, SWBT and the CLECs shall file with the Commission a report regarding the collaborative efforts to define, test, and implement a process to handle conversions when IDLC situations occur (the IDLC Report);</u></p>	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • CHC and FDT 	
Calculation:	Report Structure:
(Count of CHC/FDT circuits for which the CLEC submits a trouble report on or before noon on the next business day after conversion ÷ total # of CHC/FDT circuits converted.	Reported by CLEC and all CLECs.
Measurement Type:	
<p>Tier 1 – None</p> <p>Tier 2 – None</p>	
Benchmark:	
. Diagnostic - See PM 115.2	

115.1 Measurement	
Percentage of Provisioning Trouble Report (PTR) completed in < 8 hours.	
Definition:	
Average duration of the outage from the receipt of the PTR to the time it is cleared.	
Exclusions:	
<ul style="list-style-type: none"> Excludes Non-measured reports (CPE, Interexchange, and Information reports.) Excludes no access to the end user's location. Reports for which the trouble is attributable to the SWBT network (unless SWBT had knowledge of the trouble report prior to the due date) IDLC (pair gain systems) identified on or before the due date. (<u>Thirty calendar days after the filing of the IDLC Report as required in the Business Rule, the IDLC exclusion shall be considered deleted.</u>) 	
Business Rules:	
<p>The start time is when the report is received. The stop time is when the report is cleared.</p> <p><u>On or before June 30, 2001, SWBT and the CLECs shall file with the Commission a report regarding the collaborative efforts to define, test, and implement a process to handle conversions when IDLC situations occur (the IDLC Report).</u></p>	
Levels of Disaggregation:	
<ul style="list-style-type: none"> CHC and FDT 	
Calculation:	Report Structure:
$\Sigma[(\text{PTRs completed in } < 8 \text{ hours} \div \text{total PTRs})]$	Reported by CLEC, all CLECs.
Measurement Type:	
<p>Tier 1 – High</p> <p>Tier 2 – Medium</p>	
Benchmark:	
95% < 8 Hours	

New Measurement -

115.2. Measurement (New Measurement)	
Combined Outage Percentage of CHC/FDT LNP with Loop Lines Conversions	
Definition:	
Percentage of CHC/FDT LNP with Loop Lines where an outage occurs.	
Exclusions:	
None	
Business Rules:	
A n outage is defined as a premature disconnect found in PM 114 for both CHC and FDT, an excessive duration for FDT in PM 114.1, and a CHC or FDT PTR found in PM 115.	
Levels of Disaggregation:	
None	
Calculation:	Report Structure:
(Count of outages (pm 114, 114.1 (FDT) and 115 ÷ total CHC/FDT conversions) * 100	Reported by CLEC and all CLECs.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
5%	

XIII. NXX

117. Measurement	
Percent NXXs loaded and tested by the LERG effective date	
Definition:	
Measures the percent of NXX(s) loaded and tested in the end office and/or tandem switches by the LERG effective date	
Exclusions:	
<ul style="list-style-type: none"> • None 	
Business Rules:	
Data for the initial NXX(s) in a local calling area will be based on the LERG effective date or completion of the initial interconnection trunk group(s) where an appropriate point of interconnection was not established prior to the LERG effective date. Data for additional NXXs in the local calling area will be based on the LERG effective date.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • By Market Region 	
Calculation:	Report Structure:
(Total count of NXXs loaded and tested by LERG date, or interconnection date ÷ total NXXs loaded and tested) * 100	Reported by CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
Parity	

118. Measurement	
Average Delay Days for NXX Loading and Testing	
Definition:	
Average calendar days from due date to completion date on company missed NXX orders.	
Exclusions:	
<ul style="list-style-type: none"> • None 	
Business Rules:	
See Measurement No. 117	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • By Market Region 	
Calculation:	Report Structure:
$\Sigma(\text{Completion Date} - \text{LERG date or interconnection date}) \div (\text{number of SWBT caused late orders})$	Reported for CLEC, all CLECs and SWBT.
Measurement Type:	
Tier 1 – Low Tier 2 – None	
Benchmark:	
Parity	

XIV. BONA FIDE/SPECIAL REQUEST PROCESS (BFRs)

120. Measurement	
Percentage of Requests Processed Within 30 Business Days	
Definition:	
Percentage of Bona fide/Special requests processed and preliminary analysis provided to the customer within 30 business days of receipt of BFR.	
Exclusions:	
Excludes weekends and holidays.	
Business Rules:	
The clock starts when SWBT receives the application. The clock stops when SWBT responds with the preliminary analysis.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> None 	
Calculation:	Report Structure:
(Count of number of requests processed within 30 days ÷ total number of requests) * 100	Reported by CLEC, all CLECs, and SWBT affiliate.
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
90% within 30 business days. Critical z-value does not apply.	

121. Measurement	
Percentage of Quotes Provided for Authorized BFRs/Special Requests Within X (10,30,90) Days	
Definition:	
Percentage of quotes provided in response to bona fide/Special requests for within X (10,30,90) days.	
Exclusions:	
Requests that are subject to pending arbitration.	
Business Rules:	
The clock starts when SWBT receives the application. The clock stops when SWBT responds back to the application request with a quote.	
Levels of Disaggregation:	
<ul style="list-style-type: none"> • New Network Elements that are operational at the time of the request. • New Network Elements that are ordered by the FCC. • New Network Elements that are not operational at the time of the Request. 	
Calculation:	Report Structure:
(Count of number of requests processed within X (10, 30, 90) days ÷ total number (10, 30, 90 Days) of requests) * 100	Reported by CLEC, all CLECs and SWBT affiliate..
Measurement Type:	
Tier 1 – None Tier 2 – None	
Benchmark:	
90% within 10, 30, 90 business days. <ul style="list-style-type: none"> • Network Elements that are operational at the time of the request – 10 days • Network Elements that are Ordered by the FCC– 30 days • New Network Elements 90 days 	

123. Measurement

Percent of Timely and Compliant Change Management Notices

Definition:

The percent of timely and compliant change management notices (as specified in the current Change Management Process (CMP), as made effective July 14, 2000) for EDI/LSR ordering, EDI, CORBA, DataGate Pre-ordering interfaces, and Verigate. This measure also includes LEX, Provisioning Order Status, Order Status, Trouble Administration, EASE and SORD. Timely and complete documentation provided to the CLECs for requirements associated with releases will be part of this measurement.

Exclusions:

- Regulatory mandates as described in the CMP documentation
- Emergency fixes
- CLEC initiated changes to Final Requirements (excluding changes requested due to a mistake by SWBT identified by the CLEC)
- SWBT-initiated enhancements/changes to Requirements for which it requests that this Performance Measurement does not apply and CLECs agree

Business Rules:

Performance standards are set forth in the SBC CLEC Interface Change Management Procedure documentation, providing specific intervals/timeframes for issuance of change management interface release notices, for making available the associated Initial and Final Requirements and release associated documentation, and for allowing defined CLEC comment time periods and prescribed testing intervals. This measure is designed to measure the percent of compliant change management notices, Initial Requirements, and Final Requirements sent to the CLEC within the intervals/timeframes prescribed by the Change Management Procedure documentation for all OSS interfaces in SWBT (the Category 1 interfaces of EDI for ordering, DataGate, EDI and CORBA for pre-ordering; and the Category 2 interfaces of LEX, Verigate, EASE, Order Status, Provisioning Order Status and Trouble Administration.

Documentation that is not complete or not compliant with the Change Management Procedure (CMP) documentation is not considered compliant for purposes of this measure (e.g. calls for abbreviated CLEC comment time periods, fails to identify and provide the appropriate testing intervals, etc).. Any changes made without notice will be considered sent late. (Note: revisions to LSOR pages are not provided and are not required per CMP and will not be a part of this measurement)

SWBT will be measured on the Release Announcement (for Category One) and Initial Requirements based on whether CLECs were provided with the appropriate interval per the CMP. For purposes of the Final Requirements, SWBT will be measured on whether the notice provided the appropriate interval relative to the implementation date. Notices sent to CLECs that provide corrections to Final

Requirements initiated by SWBT that require coding changes by the CLECs will be considered late under this performance measurement. Requirements changes that do not necessitate CLEC coding corrections will not be counted in this measurement.

SWBT initiated changes to Final Requirements, including changing the Implementation Date, will be considered late. SWBT may invoke the exception process to add either a CLEC requested enhancement or a SWBT initiated enhancement to the release. However, if SWBT requests of CLECs in the Exception Request Accessible Letter, that this exception not be counted as late in this performance measurement, and if CLECs unanimously agree to the enhancement, then it will not be counted as late.

When the Exception process is invoked, the timelines/intervals set through that Exception agreement between SWBT and the CLECs as outlined in the CMP documentation would be included in this measurement.

In the event final documentation is submitted in one reporting period and a change to that documentation considered late falls into another reporting period, the miss will count in the current reporting period only and will not be retroactive.

Levels of Disaggregation:

- None

Calculation:

Percent of compliant change management notices providing the appropriate interval = (# of compliant change management notices providing the appropriate interval within the reporting period ÷ total # of change management notices sent during the reporting period) * 100

Report Structure:

Reported for all CLECs.

Measurement Type:

Tier 1 – Diagnostic

Tier 2 – Diagnostic for 1st 6 months to collect data and determine appropriate means of measurement

Benchmark:

90% compliant notices sent on time
Diagnostic for Tier 1 and Tier II

124. Measurement	
Timely resolution of significant Software Failures related with Releases	
Definition:	
Measures timely resolution of software errors after a Release that is having a significant impact on CLEC business activity.	
Exclusions:	
<ul style="list-style-type: none"> Errors where a workaround is available (workaround in this sense does not include manual faxing to the LSC) 	
Business Rules:	
<p>Software errors identified in production within two weeks of the release with no work-arounds that have a disabling affect on CLECs ability to conduct business. Significant or disabling effect on the CLEC is defined as an inability to pass to SWBT or receive back from SWBT order activity on more than 10% of the CLEC LSRs relative to normal work volumes. This impact will be viewed on a per CLEC basis, upon notification by the CLEC to the OSS Help Desk that they are impacted. Problem resolution time will start being measured from the time the problem is reported to the help desk to the time the software fix is implemented or a workaround is in place. For Tier 1 damages, the CLEC is responsible for reporting the problem to the OSS Help Desk in order for this measure to apply to the individual CLECs and will be paid to those identified with an impact of 10% or more as outlined above.</p>	
Levels of Disaggregation:	
<ul style="list-style-type: none"> None 	
Calculation:	Report Structure:
(# Significant Software Failures resolved within 48 hours ÷ Total Significant Software Failures)*100	By CLEC
Measurement Type:	
Tier 1 – High Tier 2 – High	
Benchmark:	
<ul style="list-style-type: none"> 95% completed within 48 hours or 2 days. Critical z-value applies. 	

XV. GENERAL BUSINESS RULES (APPLICABLE TO ALL MEASURES EXCEPT AS SPECIFICALLY NOTED)

A. Reporting of Exclusions

In reporting monthly data for each measurement, SWBT will report, for individual CLECs and for CLECs in the aggregate, the total number of CLEC transactions that were excluded by SWBT in reporting the results. The raw data to be available to CLECs for each measurement will include the raw data related to all excluded transactions and will include an identification of the particular exclusion category that SWBT determined to be applicable to the transaction. The exclusion should be one that is expressly provided under the business rules for the particular measurement.

B. Geographic Market Regions

All of the provisioning and maintenance measures, and certain other measures, are reported by “Market Region.” In Texas, the reference to Market Region is to one of four areas into which SWBT divides all of the Texas territory where SWBT serves as the incumbent LEC – Central and West Texas, Dallas/Fort Worth, Houston, and South Texas. A map showing the definition of these four Market Regions is attached as Appendix Five.

C. Pre-Order Backend System Database Query Availability

SWBT will agree to provide this information upon request via an assessable letter to all CLECs upon request of any individual CLEC.

D. Line Splitting

SWBT and the parties will work together to determine the appropriate levels of disaggregation to be used with line splitting once the process has been sufficiently developed to determine the appropriate performance measurement implementation. The anticipated measurements that will be impacted are: 55.1, 56, 58, 59, 60, 61, 62, 63, 65, 65.1, 66, 67 and 69.

PERFORMANCE MEASUREMENTS**Appendix One**

Subsequent Due Date Indicator	
Added to the service order whenever the due date is changed. Order can carry multiple codes. Company delay code overrides subscriber delay code.	
Subscriber(customer) Reasons:	
SA	No Access
SL	Subscriber requests later date
SO	Subscriber – Other
SP	Subscriber requests earlier date
SR	Subscriber not ready
Company (SWBT) Reasons:	
CA	Assignment office
CB	Residence/Business office
CE	Back order / unavailability of equipment or supplies from vendors
CF	Lack of Facilities (outside plant or buried service wires)
CL	Work Load
CO	Other company reasons
CS	Lack of Central Office facilities
CU	Uncontrollable circumstances

PERFORMANCE MEASUREMENTS**Appendix Two**

Disposition Codes
The following is a list of Excluded (13) disposition codes.
1301 Request for directories 1302 Reports received as a result of dual service 1303 Request for information revertive dialing codes – multi-party line (no longer applicable) 1304 CVAS Disconnect or hang up 1305 Request for information provided by another department – Business office, claims, etc. 1306 Request for SWBT to locate buried facilities 1307 Request to lower or raise wire 1308 Report on phone number which is properly disconnected, unassigned or suspended with disconnect recording on line. 1309 Report on feature customer is not being billed for 1310 Request to verify busy condition of line 1311 Report of non-SWBT plant or facilities 1313 Reports due to incorrect network administration records 1314 Request that SWBT ground be connected to electric company ground 1316 Report on service order activity prior to midnight of completion date 1317 Report on incorrect number; Regenerate report on correct number 1320 Request from Business Office 1321 Customer unable to reach business office 1322 Request from vendor for testing 1323 Changes in network structure (i.e. 10 digit dialing) 1324 Miscellaneous (Commendations, callback request for information only) 1335 Customer request service guarantee (tech gave credit) 1336 Customer request service guarantee (tech did not give credit) 1380 CNA Report Cancel by customer

PERFORMANCE MEASUREMENTS

Appendix Three

Percentage of Missed Collocation Due Dates Damages and Assessments Methodology

The following methodology will apply in calculating Tier 1 liquidated damages and Tier 2 assessments for the percentage of missed collocation due dates measurement.

Tier 1:

1. The benchmark will be 95% of Collocations completed within the due date. For example, if a CLEC has 30 collocations complete in the study month, SWBT can miss two due dates and still be in compliance. In this case no damages would apply. If, three due dates out of 30, SWBT would be out of compliance. In this case, damages would be payable on the number of collocations required to be back within the 95% benchmark.
2. Damages are calculated based on the number of days that SWBT misses the due date using the per occurrence values in the MOU, multiplied by the number of days from completion to due date.
3. In order to determine which collocations to use in the damage calculation, the missed collocation due dates will be ranked based on the number of days missed from highest to lowest. SWBT will pay damages on the highest number of days missed until the number of collocations missed is within the benchmark. For example, in the example above, if the three misses had missed days of 20, 10 and three, SWBT would pay damages on 20 missed days.
4. The collocation measurement will be used in the determination of the “K” number of allowances. In addition, it may also be excluded as defined in the MOU in the order of progression also contained there. The number of underlying data points used for the purposes of determining the order of exclusion will be the total days late for collocation projects.
5. All collocation completions in a month will be considered for the calculation of liquidated damages.
6. The critical Z-value will not be subtracted from the benchmark to determine compliance.

Tier 2:

1. Assessments will be applicable, as described in the MOU, when the measurement has been out of compliance for three consecutive months for the aggregate of all CLEC collocations.
2. Compliance will be defined as described in the Tier 1 damages above.
3. If assessments are applicable, the rolling three month average for days missed will be used to calculate the total assessments payable to the Texas State Treasury.

PERFORMANCE MEASUREMENTS

Appendix Four

Jeopardy Codes and Reasons

Jeopardies Previously Referred to as Rejects

1P	Verify address or provide nearby TN
1P	Account already converted - send cancel
1P	Invalid CFA
1P	Invalid feature detail
1P	Invalid TN
1P	Invalid due date
1P	Duplicate LSR
1P	Account not eligible for conversion
1P	Invalid feature
1P	EU name and TN do not match
1P	Provide driving instructions
1P	Duplicate circuit ID
1P	Busy cable ID and channel pair

Facility

1A	Inter Office Facility Shortage
1D	No Loop Available
1P	There are No Facilities
1P	No Trunks Available
1Q	Assignment Problem
1Y	No Central Office Equipment Available

SWBT Other

1B	Scheduling / Workload
1F	NSP Missed Appointment
1L	Frame Due Time Can Not Be Met
1N	DD and Frame Due Time Can Not Be Met

CLEC / EU (Excluded)

1C	Customer (LSP) Not Ready
1E	End User Not Ready
1G	No Access to End User Prem
1H	Central Office Freeze
1J	Special Construction
1K	Natural Disaster (Flood, etc.)
1M	Requested DD is Less Than Published Interval
1P	No Access is Provided
1P	The Premises are Not Ready
1P	Please Send SUPP to Cancel PON
1P	Notification of New Due Date

1P	Field Visit Determined Address Invalid
1P	No Rep To Prev Jeop-PON Canceled
1P	There Is No Access
1P	Need to Obtain Right of Way
1R	Customer Could Not Be Reached At The Reach Number
1S	Building Not Ready, Customer Will Advise
1T	Pole at Trailer Site is Not Set
1W	Entrance Facilities Required
1X	Not Technically Feasible

Performance Measurements

Appendix Five

LSR FIELD, FIELD NAME and FEATURES

PHASE 1

CC - COMPANY CODE

LSR NO. - LOCAL SERVICE REQUEST NUMBER

ACT - ACTIVITY (**Compare ACTION CODE associated to USOC as verification**)

PQTY - PORT QUANTITY

REQTYP - REQUISITION TYPE AND STATUS

CFA - CONNECTING FACILITY ASSIGNMENT

CHC - COORDINATED HOT CUT = Y

DFDT - DESIRED FRAME DUE TIME

PORTED # - PORTED TELEPHONE NUMBER

STREET - STREET ADDRESS (END USER'S) - (**SA field on the service order**)

PIC - INTERLATA PRESUBSCRIPTION INDICATOR CODE (**LNP only**)

LPIC - INTRALATA PRESUBSCRIPTION INDICATOR CODE (**LNP only**)

FA - FEATURE ACTIVITY (**Compare ACTION CODE associated to USOC as verification**)

FEATURE - FEATURE CODE (**Compare to USOC on service order**)

Comparison will be based on the USOCs associated with the FEATURES listed below:

Caller ID - Anonymous Call Rejection

Improved data transmission for POTS lines

900 Call Restriction (AR, KS, MO, OK) (Blocks 1+700 also)

900/976 Call Restriction - end user requested - Initial Request (TX Only)

900/976 Call Restriction - end user requested - Subsequent Request (TX Only)

Toll Restriction (Blocks: 0+, 0-, 1+, 1+900, 1+976, 1+700, 1+411, 1+555-1212, 10XXX)

Call Forwarding - Busy Line / Don't Answer

Three-Way Calling

Simultaneous Call Forwarding

Speed Calling 30

Speed Calling 8

Call Forwarding

Call Waiting

Call Forwarding - Busy Line

Call Forwarding - Don't Answer
